ORACLE COMPLEX MAINTENANCE, REPAIR & OVERHAUL 11i

The true value of any maintenance information system is revealed when complex assets – like aircraft – are down for maintenance. Fast reliable service depends on having the right parts, the right technicians and the right tools onsite and ready to go.

Oracle Complex Maintenance Repair & Overhaul (Complex MRO) delivers the total functionality Maintenance, Repair and Overhaul organizations demand to successfully manage their entire maintenance operations. MRO service providers worldwide profit from Complex MRO's rich core feature set – outperforming traditional best-of-breed-solutions – and from an out-of-the-box integration with the most powerful global enterprise application suite in the market today – the Oracle E-Business Suite.

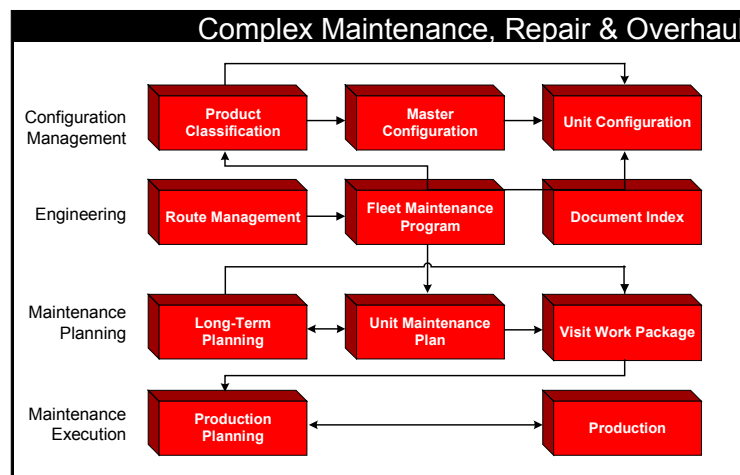

Designed and built to meet the unique requirements that distinguish MRO from manufacturing

Maintenance is not manufacturing. Improved response times, increased service levels, and faster asset turnaround times are critical to maintaining successful long-term MRO operations. Complex MRO offers a complete set of tools to heighten efficiency and reap the full benefits of true cost savings.

- **Maintenance Based Inventory Management**
- **Reliability Centered Maintenance**
- **Online Access to Repair Documentation**
- **Manage All Lifecycle Data In One Location**
- **Fully Web-Based Architecture**
- **Intuitive – User-Friendly Interface**

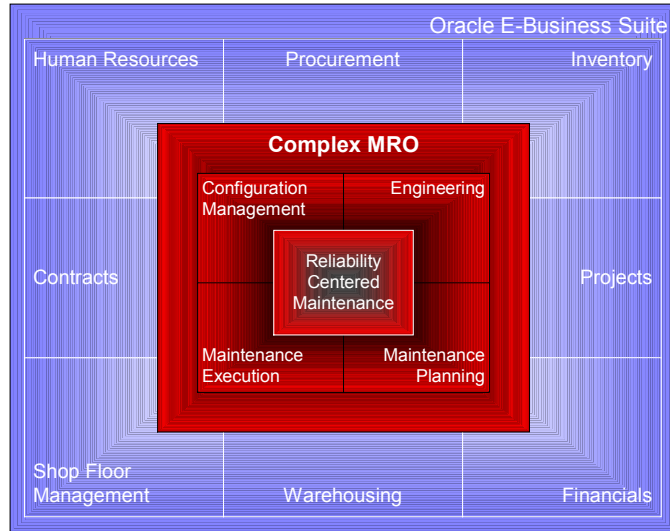

Collaborate across the entire organization from the shop floor to the back office

Complex MRO's web-based modules allow you to exercise full control over every aspect of your maintenance program – from configuration management and engineering to maintenance planning and execution. Workflow and inspection signoffs ensure total quality management. Increase profitability by fully optimizing maintenance cycles and procurement with Complex MRO's foundation for reliability centered maintenance.

Oracle Complex Maintenance Repair & Overhaul: The Core of Your MRO Solution

By integrating every component of your MRO operation, Complex MRO provides complete real-time visibility across the entire operation. Users realize a lower total cost of ownership by leveraging the out-of-the-box integration to the Oracle E-Business Suite. Connect and automate the entire flow of your business processes from financials and human resources to complete supply chain management, so your business runs at peak efficiency, worldwide. Legacy or other existing third-party systems can be integrated directly to the core Complex MRO maintenance solution through Complex MRO's open APIs.

Oracle Complex MRO: The First Fully Integrated Solution For The MRO Industry

- **Consistent Work Execution**
Increase operational efficiency across the enterprise with standardized easily updated work cards.
- **Complete Lifecycle Tracking**
Ensure the accuracy of lifecycle data for all serialized components and Line Replaceable Units increasing asset visibility and reducing unnecessary capital investments.
- **Integrated Material Planning & Procurement**
Forecast material requirements, reserve parts and initiate purchase orders ensuring material resource availability and limiting asset down time.
- **Reliable Access To Documentation**
Maintain a complete online document archive. Tie technical documents to work cards providing real-time access and expedite the repair process.
- **Dynamic Planning**
Adjust maintenance plans real time maximizing operational effectiveness and reducing asset down time.
- **Verifiable Regulatory Compliance**
Ensure strict adherence to regulatory requirements and quality inspections maximizing safety.
