COMMUNICATIONS REVENUE ACCOUNTING

KEY BUSINESS BENEFITS:

- Deliver more accurate financial tracking and reporting
- Improve operational control and compliance
- Reduce implementation and operational cost

Oracle Communications Billing and Revenue Management Integration Pack for Oracle E-Business Suite: Revenue Accounting provides a comprehensive and performance-optimized General Ledger (GL) integration between Oracle Communications Billing and Revenue Management and Oracle E-Business Suite Financials improving GL accounting, reporting and accuracy.

Product Overview

Tier-1 communications service providers (CSPs) typically have many billing systems supporting their business requirements. Timely and accurate financial reporting from each of these billing systems into a single financials system becomes a challenge. The Communications Revenue Accounting Integration Pack is designed to address this challenge by providing an automated import of general ledger reports from Oracle Communications Billing and Revenue Management to Oracle E-Business Suite Financials.

The Communications Revenue Accounting Integration Pack also calls for an automated scheduler to publish general ledger reports from Oracle Communications Billing and Revenue Management to Oracle E-Business Suite Financials. It provides new and enhanced capabilities for general ledger reports, such as incremental and cumulative revenue reporting, automated report regeneration, and the ability to customize reports. All of these features and enhancements are intended to help reduce the complexity and the time required to implement common integration functions between billing and financials systems.

Integration of Key Oracle Applications

The Oracle Communications Billing and Revenue Management Integration Pack for Oracle E-Business Suite: Revenue Accounting integrates the following Oracle applications:

- Oracle Communications Billing and Revenue Management 7.4
- E-Business Suite 11.5.10 or 12.1.1 (Oracle General Ledger)

Built on Oracle Application Integration Architecture, Oracle's next generation solution for uniting applications through pre-built business process integrations, the Communications Revenue Accounting Integration Pack comes with a flexible, standards-based framework that can be easily extended to meet your unique business needs.

Improving Value for Communications Service Providers

The integrated solution framework provides CSPs with the following key business benefits:

- Deliver more accurate financial tracking and reporting.
 - Strong cross product alignment to general accounting principles.
 - Highly configurable reporting to support one-off or unique requirements.
 - Streamline revenue accounting by harnessing the combined strengths of Oracle Communications Billing and Revenue Management and Oracle E-Business Suite Financials.
- Improve operational control and compliance.
 - Improve visibility and accuracy of accounting data through pre-built billing to financials integration.
 - Deliver highly flexible support for unique GL configurations.
 - Increase compliance and control through accounting of non-currency usage and balances.
- Reduce implementation and operational cost.
 - Pre-built integrations decrease systems implementation and maintenance costs, reduce risks and enable faster time-to-market for CSPs.
 - Optimize integration from Oracle Communications Billing and Revenue Management to Oracle E-Business Suite Financials spanning high-volume files and transactional feeds with SOA-enabled data services.
 - Single vendor solution (Oracle) will be supported and maintained as new application releases are introduced.
