

ORACLE LEGAL WHITEHILL ONE

WORKFLOW AND INTEGRATION DESIGNED FOR LAW FIRMS

KEY FEATURES

- Easy-to-use graphical interface, similar to a flow chart, makes it easy to develop and change workflows as needed
- Pre-built workflows for the most common processes found in law firms, such as new business and new hire
- Pre-built connectors to the software most commonly used in law firms
- Backed by Oracle's extensive R&D budget and deep domain expertise in the legal market

KEY BENEFITS:

- Accelerates business processes firm-wide
- Reduces risk of human error
- Enables firms to take on new business faster, making the client billable sooner
- Helps new hires be productive more quickly
- Creates an audit trail for workflows, demonstrating compliance with regulations and potentially lowering malpractice insurance premiums
- Improves efficiency, leading to less overtime hours for support staff
- Reduces cost and risk associated with systems integration
- Accelerates integration of disparate systems as a result of mergers and acquisitions

Law firms are continually looking for ways to improve profitability; yet they are often stymied by slow, manual processes that create delays in taking on new business and frustrate efforts to reduce costs. Automating manual tasks such as new business intake, new hires or accounting processes can have a positive impact on profitability and cost reduction efforts. Oracle Legal Whitehill One is a workflow and automation application specifically designed for the legal market to address these challenges.

Reducing Risk and Complexity in Law Firms

Running a dynamic, growing law firm can be complicated. Fundamental processes like new hire intake, new business intake, or check requests take up a significant amount of time and money. Even the tasks that have been computerized require human direction and never seem to integrate with other systems.

By combining workflow and data integration into one product, Oracle Legal Whitehill One offers a way to reduce the time, cost and risk associated with manual administrative processes.

Designed to Accelerate Business Processes

Workflow software can have a major impact on how quickly key business tasks are accomplished, not to mention greatly reduce the need for expensive human intervention and errors. Oracle Legal Whitehill One reduces the cost and time delays associated with these processes, by automating and integrating the various firm-wide systems. Data flows easily from one system to another as needed. Administrators no longer face the need to enter the same information into multiple systems, speeding up tasks and reducing the risk of human error.

Oracle Legal Whitehill One lets firms automate important tasks commonly performed in law firms, including:

- New business intake
- New hire intake
- Data integration / synchronization
- Ethical Walls
- Check requests
- Purchase orders
- Security management
- Approvals processing

How does it work?

With Oracle Legal Whitehill One, any automation project starts with a graphic modeling interface, similar to a flow chart. In this visual, easy-to-use environment, users can map out all the steps in a specific process without any programming. Once the process is mapped out, the systems involved can be connected, so that data is automatically routed from one system to the next according to defined workflows.

Oracle Legal Whitehill One comes with pre-built software packs called Legal Connectors, making it fast and easy to integrate commonly used legal software, including databases, content management systems, and time and billing applications.

Oracle Legal Whitehill One also includes Legal Accelerators, pre-built services used for rapid deployment of firm-specific processes. These provide the starting point for automating common law firm processes,

New Business Intake accelerators give firms a blueprint for automating the activities involved in taking on new business. Automating the process of new business intake lowers the chance of human error, reduces liability exposure and lets firms bill the client sooner.

New Hire Intake accelerators speed the process of bringing on new employees. By automating orientation processes, such as billing, payroll, and other items, firms can have new employees entered and active in the firm's system and ready to practice law. New hires can start billing time to the clients sooner. Automating and streamlining new hire intake gives IT staff time for other important tasks.

The Legal Accelerators in Oracle Legal Whitehill One speed up implementation times. In addition, the rich workflow and automation capabilities of the application let firms extend existing processes or create new ones. The number of processes your firm can automate is virtually unlimited.

Oracle Legal Whitehill One leverages your investment in existing technologies. It allows firms to create workflow solutions with tools and programs that attorneys are comfortable using, such as word processing applications, e-mail and corporate intranets. There is no need for attorneys and support staff to learn new software.

With Oracle Legal Whitehill One, development cycles are measured in weeks, not months. Oracle Legal Whitehill One gives you workflow and data integration all in one application, connecting a firm's data with the people and systems that need it.
