

Oracle FLEXCUBE Universal Banking to Drive Performance with Pervasive Intelligence

17-Sep-08

Sibos 2008, VIENNA - September 17, 2008

News Facts

Oracle Financial Services Software, a majority owned subsidiary of Oracle, today announced that Oracle FLEXCUBE® Universal Banking 10.0 and Oracle® Business Intelligence Suite Enterprise Edition Plus (Oracle BI Suite EE Plus) have been integrated to help provide banks with strategic business intelligence to improve the effectiveness of their performance and maximize profitability.

Even though business intelligence (BI) is a top priority for financial institutions around the world, few banks are maximizing value from their existing investments and executives do not have the information required to make decisions quickly and effectively.

In order for financial institutions to fully capitalize on BI, it needs to become pervasive throughout the enterprise and must provide insights that are based on both historical and real-time data.

Oracle Financial Services offers banks a unified BI infrastructure that helps link operational decisions to strategic goals and provides relevant insight to everyone in the enterprise - not just business analysts.

The combination of Oracle FLEXCUBE Universal Banking and Oracle BI Suite EE Plus will also help promote enterprise alignment with fact-based insight, improve decision-making with role-based intelligence, and enable continuous process improvements.

[Additional Integration Details and Benefits](#)

Banks and financial institutions using Oracle FLEXCUBE Universal Banking together with Oracle BI Suite EE Plus will be able to get a unified view of customer relationships across the enterprise, making it easier to anticipate customer needs and identify cross-sell and up-sell opportunities.

Employees will be able to access and analyze information relevant to their roles to improve the quality of their decisions, enhance performance and manage risks.

Oracle FLEXCUBE Universal Banking now offers the unmatched combination of ad hoc reports and pre-defined standard reports with Oracle BI Suite EE Plus. Oracle FLEXCUBE already ships with more than 175 pre-defined standard reports based on Oracle BI Publisher, the integrated reporting and document output solution of Oracle BI Suite EE Plus.

Additionally, meta-data repositories in Oracle FLEXCUBE Universal Banking aid in generating customer specific reports using Oracle BI Suite EE Plus.

Supporting Quotes

" Financial institutions face a world of increasing complexity and Oracle FLEXCUBE Universal Banking has been designed with process orchestration capabilities to help them tackle these issues. The integration with Oracle BI Suite EE Plus is designed to help them meet another challenge - to be able to draw upon and analyze information from a variety of sources swiftly and incisively which will in turn improve the quality of their decision making," says N.R.K. Raman, Managing Director and CEO, Oracle Financial Services Software.
