

BUSINESS FLOW ACCELERATOR FOR PLAN TO DELIVER FOR HEALTHCARE PROVIDERS

FEATURES AND BENEFITS

BUSINESS FLOW ACCELERATOR FOR PLAN TO DELIVER FOR HEALTHCARE PROVIDERS

- Rapidly implements applications to improve business processes for efficient material movement and Par Cart replenishment
- Automates the entire internal order fulfillment process
- Delivers an operational inventory distribution system based on proven Healthcare Provider business practices
- Offers the flexibility of fixed-scope, fixed-price or tailored implementation services to fit your needs and budget

IMPLEMENTATION BENEFITS:

- Delivers fast, cost-effective implementations
- Provides reduced risk and rapid benefits through the use of proven methodology
- Enables integration with legacy and third-party systems
- Allows you to build what you need as you need it

Can you make accurate order delivery commitments to your medical units? Would you like to improve your organization's operational efficiency of material movement and enable Par Cart replenishment, including min-max planning? Would you like to reduce your inventory while increasing your level of service? Let Oracle implement your order fulfillment process with the Business Flow Accelerator for Plan to Deliver for Healthcare Providers. The results -- lower fulfillment costs, shorter delivery lead times and improved ability to focus on service delivery rather than administrative processes.

Improving Efficiencies with Business Flows

Organizations today are looking for opportunities to improve business processes to stay competitive. Leveraging our extensive Healthcare experience in helping organizations overcome challenges, Oracle has developed Business Flow Accelerators to streamline the implementation of business flows through a fast, low cost, low risk deployment. Oracle developed business flows by integrating comprehensive sets of related business processes to form solutions for critical organizational activities, such as “inventory planning and order fulfillment.” Implementing business flows enables you to consolidate and easily manage the flow of information throughout your organization providing increased accuracy and reduced levels of inventory. Additionally, you can improve efficiencies and reduce inventory costs by leveraging proven business practices. Business flows offer a roadmap to process improvement, while Business Flow Accelerators offer a pre-configured baseline for implementing specific business flows found in the Oracle E-Business Suite.

Plan to Deliver for Healthcare Providers Business Flow Accelerator

The Business Flow Accelerator for Plan to Deliver for Healthcare Providers is designed to rapidly deliver an operational Healthcare Provider inventory distribution system so you can begin reaping the benefits of a complete, integrated solution. Business Benefits**Increase Supply Chain Visibility and Cut Costs**

Plan to Deliver for Healthcare Providers fulfills service delivery unit expectations for 24x7 ordering capability, and rapid fulfillment and delivery. Improved information and visibility throughout your supply chain enables you to meet inventory targets and consolidate suppliers, helping you to cut administrative costs.

Automate Optimal Inventory Levels and Par Cart Management

Integrated business processes across your supply chain streamline the flow of inventory information and efficiently manage this data throughout your service provider organization. A consistent and timely view of your data enables fact-based decision-making, including automated min-max based inventory and par cart replenishment.

Reduce Time Between Order and Delivery

Ship from your own inventory or drop-ship directly to your medical units and administrative offices from your suppliers. Order to delivery time is expedited and customer service is improved. Additionally, inventory turns increase as inventory levels drop up to 50%.

Integrate Systems and Increase Response Time

Your front and back office systems are seamlessly integrated, creating the business process improvements needed to rapidly respond to changing medical unit demands. Execute faster and shorten the inventory cycle time. Integration between order fulfillment and financials streamlines financial reporting, facilitating a decrease in your period close time of up to 50%.

Implementation Benefits**Fast, Cost-Effective Implementation to Automate Standard Business Processes**

With standard business processes inherent in the E-Business Suite of applications providing the roadmap, you can rapidly implement a system that meets your business requirements, automates standard business processes, and reduces the need for costly customizations, saving both time and cost.

Reduce Business Risk with Predefined Business Flows

A flow-based implementation approach mitigates business risk with pre-defined business flows implemented in a certified, pre-configured environment. Early hands-on testing ensures validation and quickly identifies any required refinements.

Rapid Time-to-Benefit Using Leading Practice Approach

By using a proven approach to implementation, your system can be up and running quickly to start driving business results through business process automation. Additionally, Oracle Tutor procedures and other implementation tools are available to help quickly train your end-users, increasing productivity and satisfaction.
