- Project Management
- Maintenance Management
- Constituent Relationship Management
- Performance Management

Doing More With Less

As a state or local government entity, budget priorities often force you to seek new ways to be more efficient and productive with fewer resources. Automate processes. Optimize project management. Comply with reporting requirements. Provide enhanced services to meet rising constituent expectations. The list is long, and the challenges can be daunting.

To do more with less, you need a comprehensive, integrated solution that can help you manage processes across your entire organization, from administering a multitude of grants to providing employee and citizen self-service applications. A solution that is flexible enough to adapt to your unique needs and to meet changing requirements. A solution that can assure citizens that investments made will deliver the best possible value—and services—over time.

Keep Service and Efficiencies Up While Keeping Costs Down

Oracle's JD Edwards EnterpriseOne provides collaborative enterprise software and services for state and local government entities. Our solutions help public organizations deliver better service to citizens and improve efficiencies while keeping costs in line. We provide the necessary tools to help government departments:

- Optimize sharing of financial data—By sharing financial data between applications, you can save time and money, and gain the flexibility you need to meet General Accounting Standards Board requirements and other challenging reporting needs.
- Streamline government workforce management—Reduce the costs of employee management by giving personnel anytime, anywhere access to required information, such as benefits forms.
- Improve project management—Manage projects effectively with JD Edwards Project Management to improve on-time, on-budget delivery of services and capital improvement projects.
- Enhance citizen relationships—Increase citizen satisfaction by streamlining constituency communications with JD Edwards Customer Relationship Management and Customer Self-Service software.
- Ensure grant reporting compliance—Assemble, view, and print reports to help meet specific grant requirements. With JD Edwards' software and services, you benefit from industry-proven functionality developed expressly for government organizations like yours.

A Solution as Unique as Your Organization

JD Edwards means something different to each of our customers. That's because they use our software for unique purposes based on their organizational goals.

Do you want to streamline financial processes? JD Edwards financial software can help integrate all your financial and accounting systems to standardize reporting and improve efficiencies.

Do you want a faster way to accommodate changes in the scope of capital improvement projects? With our Project Change Management and Subcontract Management applications, you can automate change order processing and routing to facilitate faster approvals.

Do you want to integrate and automate all of your core business processes? JD Edwards' enterprise software can help you unify your organization, front to back—from finance to payroll to procurement to project management.

And, you can improve productivity by integrating a subset of applications into your current computing environment. For example, do you have an in-house legacy system that continues to provide value? JD Edwards offers a choice of standards-based interoperability options to simplify integration of the core business applications currently in use.

With JD Edwards, you choose the scope of the solution to meet your business goals. JD Edwards' integrated, modular applications enable you to use as much or as little software as you need to achieve rapid, targeted results.

Partnering for the Long Term

With Oracle's JD Edwards EnterpriseOne, you get proven technology and software that offers the right mix of features and functions for your government entity. You benefit with knowledgeable professionals from our full-service consulting, education, and support organizations that are here to help you:

- Implement your solution quickly and effectively
- Fully utilize your JD Edwards system
- Get your employees up to speed with in-depth, job-specific training
- Provide self-service and live support when you need it
- Maintain and grow the value of your technology asset

We at Oracle believe that it's our business to make it easy for you to do business. By adopting Oracle as your long-term business partner, you can see shorter time-to-benefit and lower total cost of ownership. And, because our solutions grow and change with your business, your technology investment is an asset that increases in value over time.
