

# ORACLE MODERNIZATION

## HELPING YOU ACHIEVE YOUR MODERNIZATION GOALS

### ORACLE MODERNIZATION BENEFITS

- Understand your modernization business drivers and what they mean for modernization choices
- Determine your modernization business case
- Determine the steps in your modernization roadmap
- Maximize your use of new technology based on SOA and Grid Computing
- Work with Oracle and Oracle partners to achieve a successful modernization project

*Organizations are looking to reduce cost, increase business agility, reduce reliance on legacy skill sets and improve compliance through IT Modernization - transforming their legacy environments to modern technical environments based on SOA (Service Oriented Architecture) and Grid Computing while retaining business content. Oracle Modernization together with Oracle Modernization Alliance Partners provide the complete modernization solution for all modernization approaches – a solution that both increases your agility while mitigating the risk of your current legacy environment.*

### Why Modernize?

With continuing pressure to react to new business requirements and retiring legacy skill sets, IT organizations are finding it difficult to address ongoing business requirements. Current applications carry out functions that are critical to the business - however the environments in which they exist are holding organizations back in a number of areas:

- Existing applications are costly - their associated hardware, software and personnel costs are absorbing an ever-increasing proportion of IT budget leaving less and less budget for new development.
- Existing applications are not agile - they were not designed to react quickly to today's changing business requirements driven by increasing user access, data sharing and the need to align business processes with IT applications.
- Existing applications rely on a dwindling pool of skilled resources – many of the technologies used to create them are no longer supported
- Existing applications are difficult to make compliant – compliance concepts such as business process management, control and audit were not considered when the applications were written.

At the same time, many of these legacy applications contain valuable business content that must be preserved. The Solution to this is Modernization – and Oracle Modernization is here to help.

### Oracle Modernization

Through a variety of offerings, Oracle Modernization offers a complete solution for Modernization. These offerings include:

**THE ORACLE  
MODERNIZATION  
SOLUTION**
**KEY BENEFITS**

Working with the Oracle Modernization team helps you examine modernization options, determine partners, and build the business case needed to ensure a successful modernization experience.

**OFFERINGS**

The following are available from Oracle Modernization:

- The Oracle Modernization Discovery
- The Oracle Modernization Insight
- The Oracle Modernization Alliance (OMA)
- Rich target environment for all types of modernization

**FOR MORE INFORMATION**

General:

**The Oracle Modernization Discovery**

Not sure where to start? An Oracle Modernization Discovery call or on-site meeting with Oracle Modernization Subject Matter Experts is a quick and easy way to provide a quick look at your options. A no risk with very minimal effort to get that critical “first cut” of information.

**The Oracle Modernization Insight**

If an Oracle Modernization Discovery session points to the need for a more in-depth analysis of a specific area, the Oracle Modernization Insight is a great next step. The Oracle Modernization Insight is a 2-day executive sponsored on-site workshop that allows Oracle’s modernization team to delve more deeply with you into your specific modernization needs in order to provide more complete solution options. Working closely with you, the Oracle modernization team can help you develop your Modernization Roadmap and Modernization Business Case by understanding your specific business drivers and modernization inhibitors, examining your modernization options, discussing target architecture and examining various modernization vendor solutions.

**High Quality of Service Modernization Target**

Oracle provides a target architecture that is suitable for all types of modernization. By combining Oracle Database, Oracle Fusion Middleware and Oracle Applications Oracle provides the complete target platform for implementing SOA and Grid Computing while providing mainframe quality of service.

**The Oracle Modernization Alliance (OMA)**

The Oracle Modernization Alliance is a team of system integrators, specialty modernization vendors and product providers that work together with Oracle to help you modernize your IT environment. Working with OMA partners, Oracle Modernization is able to bring together the best of breed vendors from all aspects of modernization in order to help you choose the best modernization solution possible.

**Achieving the Successful Modernization**

Working with Oracle helps you insure a successful modernization experience. Whether determining your modernization options, building a business case, choosing what modernization partners to work with or what your target platform should be – Oracle is here to help.
