

# COVALENT FASTSTART WEB SERVER FOR PEOPLESOFT ENTERPRISE

PeopleSoft Enterprise 8 validated software integration. Covalent's Enterprise Enhanced Apache Web server. Technical support from the Apache experts.

*Covalent's FastStart Server for PeopleSoft Enterprise brings the power and reliability of a commercially supported Apache Web Server to Oracle's PeopleSoft Enterprise applications.*

*Apache is the Web server software of choice for more than 18 million Web sites worldwide. By enhancing the manageability, security and service quality of Apache, Covalent has delivered increased operational efficiency and lower cost of ownership. Since the creation of Apache, San Francisco-based Covalent has emerged as an industry leading provider of enterprise solutions for the Apache Web server and supports an impressive customer base including many Fortune 500 and Global 2500 customers.*

## Integration Overview

Covalent's PeopleSoft Enterprise validated software integration allows customers to take advantage of the reliability and security of Apache:

- Easy installation of Covalent's pre-packaged Apache solutions, optimized for your operating system.
- High performance SSL connections through Covalent's industry leading SSL module based on the RSA BSAFE SSL libraries.
- Supports a variety of installation architectures to fit your environment.

INTEGRATED WITH

PEOPLESOFT ENTERPRISE

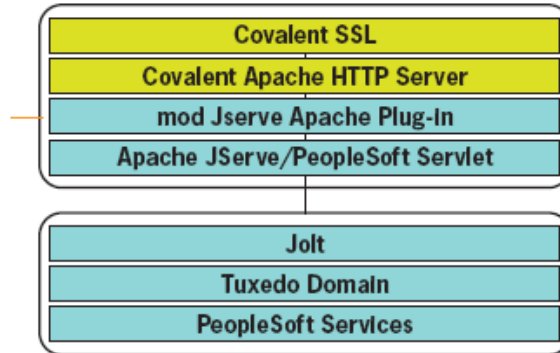

Through the Oracle PartnerNetwork Applications Integration Initiative, partners with validated integrations are able to provide customers with standards based vanilla product integrations, tested and validated by Oracle. Customers benefit from improved risk management and smoother upgrade capability, leading to a lower total cost of ownership and greater overall satisfaction.

## FastStart Web Server for PeopleSoft Enterprise

Covalent's integration of FastStart, powered by Apache, with PeopleTools is web-based. Covalent supplies a version of Apache configured with the Apache mod\_jserve Web server plug-in. Mod\_jserve in turn communicates with the JServlet engine supplied with PeopleTools. No change in the PeopleTools configuration is required for this integration. With this support for PIA, you can now use FastStart with any of your PeopleSoft Enterprise applications. Support is provided for both integrated (PeopleSoft Enterprise components and Covalent FastStart on a single server) and distributed (Covalent FastStart on one system, connected to the PeopleSoft Enterprise components on a second system) environments.
