

# CRYSTAL DECISIONS REPORTING AND ANALYSIS SOLUTIONS

PeopleSoft Enterprise 8 validated software integration. Seamless data access, interactive analysis and powerful reporting. Scalable and reliable web-based platform.

*Extend the value of your PeopleSoft Enterprise system from Oracle with Crystal Enterprise, a fully customizable, web-based solution providing secure, seamless access to interactive, actionable information for employees, customers and suppliers.*

## Crystal Decisions

With over seven million software licenses shipped worldwide, Crystal Decisions is a global information infrastructure company that leads the market in reporting, analysis and information delivery.

## Integration Overview

Certified for PeopleSoft Enterprise 8, Crystal Enterprise delivers a reliable, web-based solution that fully supports PeopleSoft Enterprise security and business views. Crystal Enterprise plugs seamlessly into Oracle's PeopleSoft Enterprise 8 Portal, completely retaining the PeopleSoft Enterprise environment. Its proven integration with PS Query ensures a scalable and cost-effective solution to accessing, analyzing, reporting and sharing information.

## Crystal Enterprise delivers:

Powerful analysis and reports from virtually any data source or application.

- Rapid integration of reports and analytical content into any web application, including PeopleSoft 8, corporate portal, Internet or intranet site.
- A scalable web-based platform for information delivery via the Web, PDAs, cell phones and other web applications.

INTEGRATED WITH

PEOPLESOFT ENTERPRISE

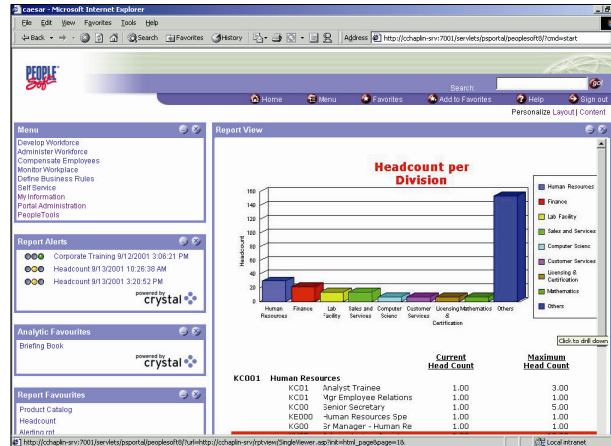

Through the Oracle PartnerNetwork Applications Integration Initiative, partners with validated integrations are able to provide customers with standards based vanilla product integrations, tested and validated by Oracle. Customers benefit from improved risk management and smoother upgrade capability, leading to a lower total cost of ownership and greater overall satisfaction.

## Crystal Enterprise for PeopleSoft Enterprise 8 Certified Software Integration

Crystal Enterprise accesses PeopleSoft Enterprise data through the application layer, via PS Query. The Certified Software Integration with PeopleSoft Enterprise 8 further assures Oracle's PeopleSoft Enterprise customers that their enterprise reporting solutions will function seamlessly with their current system, while continuing to honor PeopleSoft Enterprise security and metadata.

Crystal Enterprise is a single integrated solution for enterprise reporting and analysis from PeopleSoft Enterprise Performance Management's Enterprise Warehouse. Designed to meet web and enterprise standards for flexibility and openness, Crystal Enterprise offers a highly customizable, cost-effective solution for delivering the critical information every end user needs to drive business forward.

As an open, highly customizable system, Crystal Enterprise enables the rapid integration of reports and analytical content into any web application, corporate portal, Internet or Intranet site.

Crystal Enterprise includes Crystal Reports 8.5, to fully leverage the hundreds of pre-defined Crystal Reports shipped with PeopleSoft Enterprise modules, and Crystal Analysis Professional, to enable web-based reporting, guided analysis and interactivity. Crystal Reports is the world standard in reporting, offering easy report design from relational data sources and efficient report generation, Crystal Reports 8.5 supports DHTML, XML and PDF to meet any output requirement.

With the Crystal eBusiness Framework as its foundation, Crystal Enterprise delivers a globally scalable, multi-tier, fault-tolerant architecture. For complex applications, Crystal Enterprise deploys across multiple servers to efficiently manage user security, content organization, report processing and delivery.

Crystal Enterprise offers advanced technology for optimized report delivery including Smart Reporting, Report Streaming and Page-on-demand.

Smart Reporting Technology delivers flexible ad hoc reporting for the Web. It enables report development teams to push simple report manipulation and reformatting to end-users. With the COM-based object model design, IT can maintain strict control over the functionality provided to the end-user. There's no client software or applet to install and its ease of use means reduced end-user training.

Report Streaming is a breakthrough technology that enables real-time processing and delivery of complex reports. Developed in response to customer demands for "on-demand reporting," or the ability to run a report over the Web against live data, this technology is an industry first. Crystal Enterprise is the only information delivery system to offer this real-time optimization technology.

Page-on-demand enables greatly enhanced performance, scalability and response times. Rather than having the entire report delivered to the browser, single pages are sent down from the server as they are requested by the user. This enables the delivery of large, graphically complex reports in a thin-wire environment.

Providing a scalable, web-based platform, Crystal Enterprise is built for cross-platform deployment. With robust, built-in security and single sign-on, Crystal Enterprise integrates with any intranet, extranet, Internet or corporate portal application and scales to hundreds of thousands of people.

### **Availability**

Crystal Enterprise is available from Crystal Decisions or your Crystal Decisions reseller. Call 1-800-877-2340 or visit [www.crystaldecisions.com](http://www.crystaldecisions.com).

### **Support**

Crystal Enterprise is fully supported by Crystal Decisions.

### **Validation Environment**

**Hardware:** Intel-based

**Software:** PeopleTools 8.14

**Partner Product:** Crystal Enterprise

**Database Platform:** Oracle
