**INTEGRATED WITH**

**E-BUSINESS SUITE**

Through the Oracle PartnerNetwork Applications Integration Initiative, partners with validated integrations are able to provide customers with standards based vanilla product integrations, tested and validated by Oracle. Customers benefit from improved risk management and smoother upgrade capability, leading to a lower total cost of ownership and greater overall satisfaction.

*“Automate your supply chain operations, reduce inventory cost, and improve workflow efficiency.”*

*AtPar wireless supply-chain product suite is a single solution delivering seamless integration with ERP systems, designed to reduce time-to-value and costs of implementation and to future-proof your supply chain operations.*

## Company Overview

AtPar Inc. is a supply-chain execution software company offering a suite of well-integrated, feature-rich supply-chain execution applications on handhelds that deliver business benefits in a short duration while maintaining a low cost of purchase and maintenance. AtPar's industry-leading mobile applications are successfully addressing the challenges faced by the healthcare industry today. Through our knowledge of and experience in deriving significant value from enterprise supply-chain management systems and ERPs, we have brought to market the AtPar suite of products, which specifically addresses the operational issues in supply-chain management in hospitals. By combining significant domain knowledge, industry-standard technology, and insight into the latest mobile technologies, we effectively deliver applications that integrate seamlessly with many of the industry's materials management and supply-chain management applications. ## Integration Overview

AtPar CartCount and AtPar Receiving integrate with Oracle Inventory and Oracle Purchasing, making use of the standard Oracle-provided open-interface tables and routines. AtPar products provide users with a mobile interface to send data to the Oracle E-Business Suite. Used especially with hospital management systems, AtPar CartCount helps hospitals maintain an accurate inventory. AtPar Receiving is used in hospital warehouses to help them efficiently receive materials.

AtPar integration with Oracle E-Business Suite offers the following:

- Standard transactions that use supported integrations to Oracle Applications
- Ability for mobile devices to operate both on- and off-network
- Easy-to-use graphical user interface

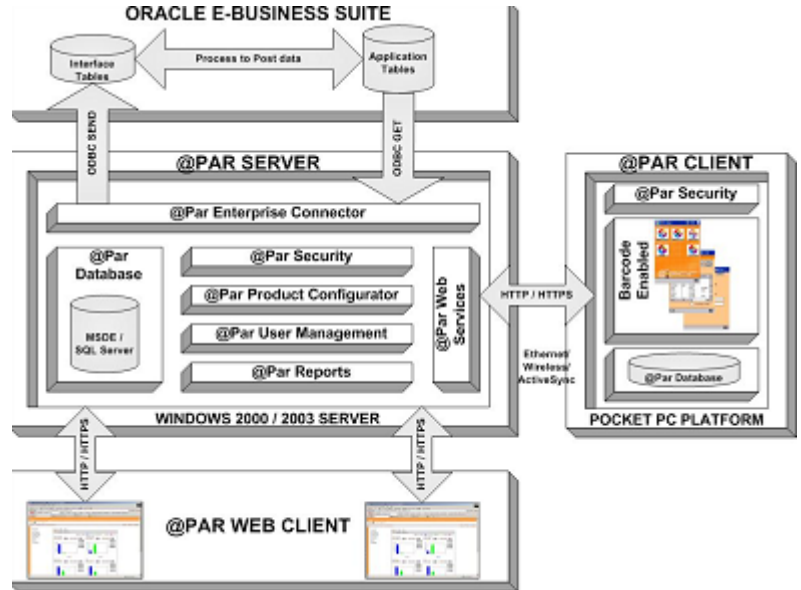

## Integration Details

The AtPar integration with Oracle E-Business Suite was validated for the following functionalities:

- Integration of AtPar CartCount with the Inventory Replenishment Interface brings on-hand information into Oracle Inventory and also performs replenishment of on-hand quantities using standard Oracle procedures

- Integration of AtPar Receiving with Oracle Purchasing provides users with a mobile interface to bring receiving transactions into Oracle Inventory
- The Receiving Integration provides direct delivery, standard delivery, and inspection delivery features to users
