Company Overview

HighJump Software, a 3M company, is a global leader in providing adaptable supply chain execution solutions that streamline manufacturing and distribution.

HighJump's integrated solutions optimize the flow of inventory throughout the supply chain by facilitating collaboration with customers, suppliers and trading partners. These solutions combine robust, standard functionality; a best practices-based implementation methodology; and an adaptable architecture that facilitates fast, cost-effective configurations. The result: a low total cost of ownership for over 700 satisfied customers worldwide.

Integration Overview

Data Collection Advantage for PeopleSoft expands PeopleSoft business operations to the warehouse, the shop floor and the mobile workforce by providing real-time data capture and process improvement. Data Collection Advantage for PeopleSoft accomplishes this by filling gaps and offering business solutions that are not currently available within the standard PeopleSoft e-Business suite, including Genealogy, Serial Number Tracking, and Remote/Mobile Operations. Data Collection Advantage for PeopleSoft supports a wide variety of ADC hardware types, including Fixed Position Terminals and Scanners, Radio Frequency (RF), Personal Digital Assistants (PDAs), Label Printers, Scales and Programmable Logic Controllers (PLCs).

Since 1996, HighJump Software, a 3M company, has been working directly with PeopleSoft to design, develop and continually enhance its automated data collection (ADC) software product. HighJump Software offers validated data collection solution for PeopleSoft versions 7.5, 8.0, 8.4, 8.8, and now 8.9. As a PeopleSoft-validated ADC solution, Data Collection Advantage integrates with PeopleSoft's Manufacturing, Inventory and Purchasing modules.

With Data Collection Advantage for PeopleSoft, PeopleSoft users now have the benefit of accurate, real-time data that can be used to make minute-to-minute business decisions without hesitation. To date, more than 85 joint customers have benefited from this data collection solution.

INTEGRATED WITH

PEOPLESOFT ENTERPRISE

Through the Oracle PartnerNetwork Applications Integration Initiative, partners with validated integrations are able to provide customers with standards based vanilla product integrations, tested and validated by Oracle. Customers benefit from improved risk management and smoother upgrade capability, leading to a lower total cost of ownership and greater overall satisfaction.

Integration Methodology and Technology

Data Collection Advantage for PeopleSoft is an ADC solution that can be implemented, modified and enhanced without custom code. Every aspect of the data collection solution can be configured or modified with easy-to-use GUI screens. This unique development approach results in faster, easier and less expensive implementations than custom-coded solutions. It also reduces the long-term Total Cost of Ownership, minimizes the need for future support and allows companies to migrate and enhance the system at their own pace.

With Data Collection Advantage for PeopleSoft, HighJump Software has developed an automated data collection solution that truly leverages and extends PeopleSoft functionality. Using PeopleSoft's XML interface, Data Collection Advantage for PeopleSoft posts data to PeopleSoft in real time. As a result, the most common transactions can be entered directly into PeopleSoft using simple bar code scanning devices or personal digital assistants (PDAs) – ensuring near-perfect entry accuracy and instant access to key decision-making data.

Availability

Inquiries to purchase Data Collection Advantage for PeopleSoft can be made through the general HighJump Software phone number or by sending an email to info@highjumpsoftware.com

Support

HighJump offers 24/7 support. Worldwide Support knows solution details and assists in troubleshooting and problem resolution. This team of full-time technicians combines supply chain knowledge with the specifics of each individual application.

Support inquiries can be made through the general HighJump Software phone number or by sending an email to support@highjumpsoftware.com.

Environment

HighJump Environment:

Product:	DCA for PeopleSoft
Version:	7.9
Operating System:	Windows 2003 Server

PeopleSoft Enterprise Environment:

Product:	SCM 8.9
Tools:	8.46.05
Operating System:	Microsoft 2003 Server
Database:	Oracle 10.1.0.3
