AutoVue + Primavera

Complete Project Document Visualization & Collaboration

Joint Value – The Proposition

Combination of AutoVue and Primavera:

- Accelerates project delivery by providing the right documents to the right resources at the right time to increase team response rates, and provide all critical information for improved decision making
- Enables multi-team direct project and document collaboration in real-time from anywhere via the web
- Establishes a reliable audit trail of all collaboration steps, decisions, changes and approvals on engineering and contract documents for full accountability and minimized risk

Market Overview

Project & Content-Intensive Industries Require Primavera & AutoVue

Oil & Gas

Utilities

Engineering & Construction

- Enhance routine maintenance and refinery turnarounds
- Improve field service operations with greater asset visibility
- Expedite project delivery with improved collaboration with all teams during capital project construction

- Enhance routine maintenance, plant shutdowns & outages
- Improve communication & collaboration by breaking down information silos
- Improve multi-team collaboration for expedited capital project expansion and construction
- Improve field and back office access to and collaboration around project critical documents and design files
- Enable fully integrated document review, collaboration, control and audit capability in project Change Management process

Oil & Gas

Solution Key Benefits:

- Effectively collaborate for efficient and expedited refinery turnarounds
- Maximize asset use with greater asset visibility
- Enhance capital projects and reduce costs with improved multi-team collaboration
- Improve interoperability and break down siloed/fragmented data

Products

- Primavera P6 Enterprise Project Portfolio Management
- AutoVue Enterprise Visualization

Use Cases

- Refinery Turnarounds
- Asset Maintenance Operations
- Field Service Repair
- Capital Project Expansion & Construction

Primary Targets

- Upstream, Downstream and Oil Field Services
- Operations, Engineering, Maintenance/Reliability & Capital Groups

Utilities

Solution Key Benefits:

- Enhance maintenance operations and outages
- Maximize plant reliability by assessing and addressing risks early
- Effectively collaborate with all teams during capital project expansion & construction
- Improve interoperability and break down information silos and fragmented data

Products

- Primavera P6 Enterprise Project Portfolio Management
- AutoVue Enterprise Visualization

Use Cases

- Plant Outages
- Asset Maintenance Operations
- Field Service Repair
- Capital Project Expansion & Construction

Primary Targets

- Power Generation
- Operations, Engineering, Maintenance /Reliability & Capital Groups

Engineering and Construction

Solution Key Benefits

- Improve field and back office access to and collaboration around project critical documents and design files
- •Enable fully integrated document review, collaboration, control and audit capability in project Change Management process
- Prevent and protect against claims

Products

- Primavera P6 Enterprise Project Portfolio Management
- Primavera Contract Management
- AutoVue Enterprise Visualization

Use Cases

- Field Collaboration
- Design Review
- Constructability Review
- Change Management

Primary Targets

- Owners
- EPCs, CMs, & General Contractors
