Through the Oracle PartnerNetwork, partners with validated integrations are able to provide customers with standards-based product integrations, tested and validated by Oracle. Customers benefit from improved risk management and smoother upgrade capability, leading to a lower total cost of ownership and greater overall satisfaction.

eTimeMachine Audit Trail
Discover the value of true business audit.

Company Overview

eTimeMachine is a software development company with unique expertise in enterprise work management software development and implementation. It focuses on providing custom work management solutions that best meet today's fast-paced business environment with ever-changing demands constantly being placed on organizations and their management and teams.

Integration Overview

The integration of eTimeMachine Audit Trail 8.5 with Oracle's Primavera P6 Enterprise Project Portfolio Management 8.2 creates a highly configurable monitoring tool that allows companies to track changes on specified business objects in Primavera P6 Enterprise Project Portfolio Management with the required level of details. Companies can continue to utilize full functionality of Primavera P6 Enterprise Project Portfolio Management while turning it into a fully auditable application.

eTimeMachine Audit Trail for Primavera P6 Enterprise Project Portfolio Management is the Audit Trail solution focused on Primavera P6 Enterprise Project Portfolio Management application business objects and allows users to focus on tracking changes only on those business objects critical for the business, thus eliminating the following major issues that users face when tracking changes:

- Fast growth of audit information data storage
- Limited or next to zero manageability of the collected information
- Lack of relevance between business and collected audit information

Integration Details

1. **Monitoring Critical Changes.** eTimeMachine Audit Trail for Primavera P6 Enterprise Project Portfolio Management helps your company minimize costs by enabling you to concentrate on work that needs to be done instead of spending time and effort investigating errors.
2. **Auditability Requirements Compliance.** eTimeMachine Audit Trail for Primavera P6 Enterprise Project Portfolio Management allows you to continue utilizing full functionality of Primavera P6 Enterprise Project Portfolio Management while turning it into a fully auditable application.
3. **Controlling Audit Data Volumes.** eTimeMachine Audit Trail for Primavera P6 Enterprise Project Portfolio Management collects only the historical information required by your business, helping to keep the data volumes down and leaving a

minimum footprint on your system performance.

4. License Use Monitoring. Being business-object oriented, eTimeMachine Audit Trail tracks users' activity and provides enough data to make informed license allocation and procurement decisions, thus maximizing return on investment into the application licenses.

eTimeMachine Audit Trail for Primavera P6 Enterprise Project Portfolio Management is a client-server, two-tier application. eTimeMachine Audit Trail schema resides in the same database where Primavera P6 Enterprise Project Portfolio Management schema resides. All of the triggers used by eTimeMachine Audit Trail, business rules information, eTimeMachine Audit Trail configuration, and the monitoring data are all located in the eTimeMachine Audit Trail schema. Such setup ensures that no alternations are ever done to Primavera P6 Enterprise Project Portfolio Management schema as well as to Primavera P6 Enterprise Project Portfolio Management schema objects.
