Oracle Exastack Program: Be Preferred by Customers

Oracle Exastack is an Oracle PartnerNetwork (OPN) program that provides Independent Software Vendors (ISVs) and other OPN members with enablement and marketing resources to deploy their applications on Oracle Engineered Systems.

With Oracle Engineered Systems, ISVs can realize dramatic performance improvement, reduce costs and implementation time, enable new functionality, and transition to the cloud. Though the Oracle Exastack Program, you can promote the benefits of running your applications on Oracle technology.

Consisting of the Oracle Exadata Database Machine, Oracle Exalogic Elastic Cloud, Oracle Exalytics In-Memory Machine, Oracle SuperCluster, Oracle Database Appliance, Oracle Big Data Appliance, and Oracle Private Cloud Appliance, Oracle Exastack is based on Oracle servers, storage, networking and software – all engineered and optimized to work together.

Unleash ISV Application Performance with Oracle Engineered Systems

Oracle Exastack program enables ISVs and other OPN members to leverage a scalable, integrated infrastructure to deliver their applications tuned, tested and optimized for high performance.

Oracle Engineered Systems allow OPN members to run their solutions on an integrated system at a reduced cost, while enjoying peak application performance. These products provide OPN members with the optimal infrastructure for database and application workloads across on-premise, cloud based, and hybrid environments.

Oracle Exastack Program Offerings & Opportunities

OPN members can leverage the Oracle Exastack program to achieve an Oracle Exastack Ready and Oracle Exastack Optimized status.
Oracle Exastack Ready

ISVs and other OPN members may qualify for Oracle Exastack Ready based on their application support for Oracle Solaris, Oracle Linux, Oracle VM, Oracle Database, Oracle WebLogic Server, Oracle Exadata Database Machine, Oracle Exalogic Elastic Cloud, Oracle Exalytics In-Memory Machine, Oracle SuperCluster, Oracle Database Appliance, Oracle Big Data Appliance and Oracle Private Cloud Appliance.

Oracle Exastack Optimized

Customers can confidently choose a partner's Oracle Exastack Optimized application, knowing it has been tested and tuned with Oracle Exadata Database Machine, Oracle Exalogic Elastic Cloud, Oracle Exalytics In-Memory Machine, Oracle SuperCluster, Oracle Database Appliance or Oracle Big Data Appliance with a goal of delivering speed, scalability and reliability.

Oracle Exastack program Alignment with OPN

Partners participating in the Oracle Exastack program can use their Oracle Exastack Ready and Oracle Exastack Optimized applications to help qualify for advancement within the OPN levels that offer additional business benefits.

Take Advantage of Partner Enablement Resources

Oracle Exastack lab environments and related technical enablement resources are available for OPN members to further their knowledge of Oracle Engineered Systems and qualify their applications for Oracle Exastack Optimized. Visit the OPN Competency Center and OPN Knowledge Zones for additional information.
