The Complete Solution for Businesses of Any Size

Oracle Business Accelerators deliver world-class functionality to answer the challenges facing manufacturers.

Companies face intense global competition and strive to keep supply chain costs low while maintaining compliance and customer satisfaction. Excellence in supply chain execution is key to gain and protect a leadership position in the marketplace. Organizations must innovate to manage escalating costs and drive efficient project and services management. Business applications must be scalable to enable growth with minimized initial implementation outlay, protecting your investment over time.

Sample Key Business Processes Enabled

Period End Close to Financial Reports

- Automate period closing and reporting
- Quickly and effectively generate key financial reporting requirements across the enterprise
- Understand the business position in real-time using Daily Business Intelligence

Order to Shipment

- Fulfill customer orders in an order to shipment environment
- Execute varied customer shipment models (standard or drop shipments, ATO, PTO)
- Efficiently manage order cycle information – pricing, available to promise (ATP), booking, shipping and credit holds

Forecast to Plan - Advanced

- Manage demand and supply planning processes
- Plan for future requirements leveraging transaction history and planner adjustments for statistical forecasts
- Create a supply plan consisting of purchase orders and discrete work orders to meet material demands
