- Flow Scripts
- Process Models
- Business Case Presentation

**Project Team**

- How-to Guides
- Online Configuration Tool

**The Complete Solution for Businesses of Any Size**

Oracle Business Accelerators deliver world-class functionality to answer the challenges facing manufacturers.

Companies face intense global competition and strive to keep supply chain costs low while maintaining compliance and customer satisfaction. Excellence in supply chain execution is key to gain and protect a leadership position in the marketplace. Organizations must innovate to manage escalating costs and drive efficient project and services management. Business applications must be scalable to enable growth with minimized initial implementation outlay, protecting your investment over time.

**Sample Key Business Processes Enabled**

**Period End Close to Financial Reports**

- Automates period closing and reporting
- Quickly and effectively generates key financial reporting requirements across the enterprise
- Understands the business position in real-time using Daily Business Intelligence

**Order to Shipment**

- Fulfills customer orders in an order to shipment environment
- Executes varied customer shipment models (standard or drop shipments, ATO, PTO)
- Efficiently manages order cycle information – pricing, available to promise (ATP), booking, shipping and credit holds

**Forecast to Plan – Advanced**

- Manages the global planning and scheduling processes
- Handles Customer Collaboration in arriving at a consensus Forecast
- Creates a supply plan consisting of purchase orders and discrete work orders to meet material demands
