**The Complete Solution for Complex Electronic Equipment Manufacturers of Any Size**

Oracle Business Accelerators deliver world-class functionality to answer the challenges facing today's complex equipment manufacturers.

Complex equipment makers face shorter product lifecycles coupled with increasing design complexity. Manufacturers must place emphasis on delivering differentiated, complete systems with value-added services. Business applications must be scalable to enable growth with minimized initial implementation outlay, protecting your investment over time.

**Sample Key Business Processes Enabled**

**Sourcing Requirements to Agreement**

- Establish vendor base, outsource non-proprietary components and track supplier performance
- Manage the entire procurement cycle from RFQ to final purchase agreements/contracts
- Complex coordination of global/regional outsourced manufacturers and service providers

**Kanban Setup to Plan**

- Enable lean, agile supply networks
- Utilize flow manufacturing to streamline the process for setting to managing a Kanban plan
- Conduct Kanban what-if analysis, adjust Kanban plan based on run time data

**Schedule to Build**

- Issue project-related work orders for manufacturing and issue material to work orders
- Execute and record operations activity, inspect goods
- Return components to stock and close work in process transactions
