The Complete Solution for Commodity & Specialty Chemical Producers of Any Size

Oracle Business Accelerators deliver world-class functionality to answer the challenges facing process manufacturers.

Process industries face intense global competition and must strive to keep their supply chain costs low while maintaining regulatory compliance and customer satisfaction. Excellence in supply chain execution is the key to becoming an industry leader. Organizations must innovate to manage escalating costs, support more specialty products, ensure regulatory compliance, and attain trade management efficiency. Business applications must be scalable to enable growth with minimized initial implementation outlay, protecting your investment over time.

Sample Key Business Processes Enabled

Quality Issue to Resolution

- Drive efficient product safety and compliance
- Identify quality issue, trace product lots and attributes from lot genealogy
- Perform corrective action, report quality results

Stability Study Development to Evaluation

- Plan, setup, execute and evaluate stability studies for new products
- Determine Shelf life and Storage conditions

Forecast to Plan - Advanced

- Manage global planning and scheduling process
- Secure advanced collaborative forecasting and production scheduling with key partners
- Avoid costly out-of-stock conditions by aligning production with customer demand
