- Online Configuration Tool

The Complete Solution for Consumer Products-Food & Beverage Producer of Any Size

Oracle Business Accelerators deliver world-class functionality to answer the challenges facing process manufacturers.

Process industries face intense global competition and strive to keep their supply chain costs low while maintaining compliance and customer satisfaction. Excellence in supply chain execution is key to becoming an industry leader and organizations must innovate to manage escalating costs, support more specialty products, ensure regulatory compliance, and attain trade management efficiency. Business applications must be scalable to enable growth with minimized initial implementation outlay, protecting your investment over time.

Sample Key Business Processes Enabled

Quality Issue to Resolution

- Drive efficient product safety and compliance in accordance with section 21 part11 and section 211.186 & 211.100 of US CFR
- Identify quality issue, trace product lots and attributes from lot genealogy
- Perform corrective action, report quality results

Execute Trade Promotion to Analysis

- Improve trade promotions and retail execution
- Create and extend trade promotion
- Execute promotion and evaluate promotion effectiveness

Forecast to Plan - Advanced

- Manage global planning and scheduling process
- Secure advanced collaborative forecasting and production scheduling with key partners
- Avoid costly out-of-stock conditions by aligning production with customer demand
