

New Features in Oracle BAM 11.1.1.4.0

Jan 15,2011

Multiple Database support -

DB2 and SQL support for BAM database. Please review certification information**.

http://download.oracle.com/docs/cd/E17904_01/install.1111/b32474/common.htm#ASINS277 –

** Certification matrix pointed to in the document needs to be updated.

Enhanced Real Time Alerting and Action-

Send alerts to non-BAM users , automatically invoke webservices over HTTPS, parameterized alerts and more.

http://download.oracle.com/docs/cd/E17904_01/integration.1111/e10224/bam_alerts_dev.htm#BABEJDFE

Support for complex data level security filters

Chain multiple security filters for a Dataobject for tighter data level access

http://download.oracle.com/docs/cd/E17904_01/integration.1111/e10224/bam_data_objects.htm#BA BJIDDB

Pre-configured B2B integration

Out of the box BAM artifacts to enable BAM dashboards for B2B data

http://fmwdocs.us.oracle.com/doclibs/fmw/E10285_01/integration.1111/e10229/b2b_bam.htm#XBBUG1772

Credential mapping for ADF applications powered by real time data

Maintain data level security by connecting to BAM using ADF credentials for applications using BAM Data control

http://download.oracle.com/docs/cd/E17904_01/integration.1111/e10224/bam_data_control.htm#BA BJHEDD

Enhanced Monitor Express artifacts for BPM

Automatic generation of BAM Data Objects for deployed BPM processes. Enhanced Custom Business Indicator Data Object to allow filter for latest updates for each process instance.

http://download.oracle.com/docs/cd/E17904_01/integration.1111/e10224/bam_adapter.htm#BA BGAIJFJ

Additional Notes:

This patchset includes performance improvements regarding Active Now as well as Web Services
A number of known issues have been addressed in this patchset
Please read the 11.1.1.4.0 Release notes for SOA for more information.
