

Power Pack Member Search Extension

Installation

Launch (double click) the “.svext” installation on a Windows machine with Smart View 11.1.2.5.210 or above installed along with Office 2007 and Office 2010. The extension will be installed in the user’s application data folder with no additional user interaction required unless the installation fails.

Note: Smart View 11.1.2.5.210 or above is required for this extension to work.

Usage

The Power Pack Member Search extension allows users to search on Essbase Members in an outline without needing to open the member selector dialog. Once found member names can be pasted in the sheet and basic member information can be displayed. To access this panel, from the Smart View Panel Home dropdown, select ‘Member Search’.

The screenshot shows the Microsoft Excel interface with the Smart View extension. The main window displays a spreadsheet titled 'Book1 - Microsoft Excel' with the following data:

	A	B	C	D	E	F	G	H	I	J	K	L	M	N	O
1		Sales	COGS	Total Expenses											
2	Qtr1	96020	42877	28240											
3	Qtr2	101679	45362	29210											
4	Qtr3	105215	47343	29960											
5	Qtr4	98141	43754	28587											
6	Year	401055	179336	115997											

The Smart View panel on the left shows the 'Member Search' section with a search filter set to 'S'. Below the search filter, there are sections for 'Measures', 'Sales', 'COGS', 'Total Expenses', 'Misc', 'Additions', and 'Ratios', each with a tree view of levels and generations. A small dialog box titled 'POV [Book1]' is open in the center of the spreadsheet, showing dropdown menus for 'Product', 'Market', and 'Scenario', along with a 'Refresh' button.
