

ORACLE WEBCENTER CONTENT FOR LIFE SCIENCES

A FLEXIBLE CONTENT MANAGEMENT PLATFORM FOR:

- RESEARCH AND DEVELOPMENT
- QUALITY AND MANUFACTURING
- REGULATORY COMPLIANCE
- CLINICAL TRIALS
- SALES AND MARKETING
- FINANCE AND ACCOUNTING
- CONTRACTS AND LEGAL

KEY FEATURES

- A Single, Comprehensive Enterprise-Class Content Management Platform for Document Management, Digital Asset Management, Imaging and Capture, and Records and Retention Management
- Full-Featured Content Management Services including check in/out, version control, full text search, metadata, workflow, rendering, and watermarking
- FDA 21 CFR Part 11 Compliance

KEY BENEFITS

- *Reduce Costs* – manage all unstructured content on a single flexible platform, automate manual business processes and digitize paper-based documents
- *Gain Efficiencies* – with a single source of truth, streamlined business processes, and easier access to content across your organization
- *Reduce Risks* – improve content control and auditability, comply with FDA 21 CFR Part 11, and ensure content security
- *Create Value* – improve business agility and speed time to market by leveraging a single content platform across multiple applications, business processes and departments

Oracle WebCenter Content is the most flexible enterprise content management platform for life sciences – enabling you to efficiently manage the entire lifecycle of documents and other unstructured content while minimizing compliance risks. With Oracle WebCenter Content, you reduce the costs and complexity of managing content while improving business agility and time to market.

Content Management for Life Sciences

The ultimate goal of your organization is to bring new therapies to market quickly and more profitably. But to do this, you must have efficient processes in place throughout your organization, including the proper management and governance of documents, reports, and other unstructured content. Oracle WebCenter Content’s life sciences solution allows you to implement best practices around this content and lower both the costs and risks of managing unstructured content across your organization. With Oracle WebCenter Content, you will save money and improve operational efficiencies by streamlining collaboration, automating business processes, and lowering costs related to the creation, management, and storage of unstructured content. In addition, Oracle WebCenter Content provides the governance and auditing capabilities needed to minimize the risks and costs associated with regulatory and legal compliance.

A Comprehensive Content Management Platform

The Oracle WebCenter Content solution is designed to meet your business requirements without burdening IT with a high-maintenance, cumbersome solution.

Oracle WebCenter Content is not a collection of disparate products sold as an integrated suite. It is a single, comprehensive content management platform providing a complete range of content management services including version control, metadata support, full text search, workflow, rendering and watermarking capabilities. In addition, Oracle WebCenter Content has the flexibility and configuration capabilities needed to meet the specific content management needs of your business, from Research and Clinical to Manufacturing and Sales & Marketing.

Oracle WebCenter Content – Comprehensive Content Management		
• Regulatory Submissions Management	• SOP Management	• Clinical Content Management
• Sales and Marketing Material Management	• Records and Retention Management	• Document Authoring and Collaboration
• Document Capture and Imaging	• Digital Asset Management	• Web Content Management

Reduce Compliance Risks and Costs

Oracle WebCenter Content complies with a number of regulatory guidelines, including 21 CFR Part 11 and similar mandates outside of the U.S. It has automatic version control, electronic signature and watermarking functionality, a flexible workflow engine, and comprehensive security and auditability capabilities built on top of a robust, scalable platform that can manage all your controlled documents, from SOPs to NDAs. By centralizing on WebCenter Content, as opposed to managing a collection of point solutions, you can minimize your compliance risks while simplifying your content management infrastructure, saving you both time and money.

Pre-Integrated to Reduce Costs and Complexity

Oracle WebCenter Content is designed to protect and extend your existing IT investments by interoperating with your existing infrastructure. Oracle WebCenter Content works out of the box with a variety of file systems, databases, and LDAP services and is pre-integrated with Oracle Fusion Middleware technologies such as Oracle BPM Suite, Oracle SOA Suite, and Oracle Enterprise Manager. For easier document collaboration and re-use, WebCenter Content can work with both Microsoft SharePoint and WebCenter Portal to seamlessly manage content across intranets, extranets, portals and websites.

For organizations using Siebel CTMS, Primavera, E-Business Suite, J.D. Edwards and other enterprise applications, Oracle WebCenter Content has out-of-the-box integrations allowing you to move away from siloed repositories with poorly managed content and instead centralize all your content in a single, scalable, Part 11-compliant system.

With its out-of-the-box integrations and service-oriented architecture, Oracle WebCenter Content has the needed flexibility to leverage your existing IT infrastructure and provide a content management platform that is quick to deploy, easy to integrate and enterprise scalable.

Ease of Use for Business Users

Oracle WebCenter Content allows business users to work on documents and interact with Oracle WebCenter Content from within the desktop productivity tools they use every day. Via plug-in, you will enjoy convenient content management capabilities such as check in, check out and search from within desktop applications such as Microsoft Word, Excel, and Outlook.

For automating business workflows, WebCenter Content's configurable web UI gives you the guidance and intuitive navigation you need to easily and securely author, review, and approve SOPs, NDAs, and other documents.

Built for the Enterprise

Manageability

The centralized administration provided by Oracle WebCenter Content results in streamlined provisioning, better manageability, and lower cost of ownership. Unlike other content management platforms, Oracle WebCenter Content is a single platform that enables an administrator to manage all content services and access all reports and logs from a centralized console.

Scalability

Organizations that standardize on Oracle WebCenter Content get a solution with a smaller, more coherent footprint that is designed to easily and predictably scale to tens of thousands of users and billions of documents. As an enterprise-class content management platform, Oracle WebCenter Content is designed to manage the full lifecycle of all your unstructured content

and grow with the needs of your business.

Security

With Oracle WebCenter Content security controls, an administrator can define and apply access control as needed for specific users, groups, departments or across the entire organization. As an added level of protection, Oracle WebCenter Content provides advanced security options like data encryption and additional restrictions on database access.

Support for Global Organizations

Oracle WebCenter Content is designed for the needs of today's global life sciences organization, with localization support for over 20 languages and the ability to handle time zone and identity management issues that prove challenging for other content management solutions.

Oracle - a Strategic Vendor for Life Sciences

According to IDC Health Insights, Oracle is the #1 enterprise software vendor in life sciences, providing more than 30 industry-specific applications to help pharmaceutical, biotechnology, and medical device companies accelerate R&D, expedite clinical trials, and speed time to market. With WebCenter Content, Oracle has a market-leading content management platform that has the functionality, Part 11 compliance, and out-of-the-box integrations you need to better manage all your unstructured content now and in the future.
