1 Tutorial Overview

JD Edwards EnterpriseOne Tools release 8.97 delivered an embedded integration with Oracle BI Publisher. This embedded solution allows customers to associate a BI Publisher template with a JD Edwards EnterpriseOne UBE. With embedded BI Publisher, customers can leverage the power of existing UBEs to manipulate and extract data from JD Edwards EnterpriseOne. Furthermore, customers can leverage the functionality of BI Publisher to produce high resolution output and various delivery methods such as printing and email. This lab demonstrates some of these capabilities.

This tutorial details the steps to:

- Create new BI Publisher templates.
- Associate BI Publisher templates with an UBE.
- Executing the UBE with the associated template.
2 Generate XML

2.1 Sign-on

1. It is important to note that a Report Definition has already been created for this example. Instructions on how to create a Report Definition is documented in the JD Edwards EnterpriseOne BI Publisher guide.

2. Start Internet Explore and from Favorites select JDE EnterpriseOne

3. Enter Username and Password
   - Username: JDE
   - Password: JDE
2.2 Generate XML Source Code

1. Enter GH9111 in Fastpath and Click Double Arrows

2. On the left hand menu click Report Definitions

3. Click the Checkbox for Grid Row Report Definition Name RD03B165
4. Click Submit
5. Click Submit

6. Click OK

2.3 Retrieve XML Source Code

1. Click Form / Submitted RD Jobs
2. Click any Grid Row Checkbox
3. Click Row / View RD Source

4. When Prompted click Save and Save the file to your desktop

2.4 Create BI Publisher Template in MS Word

1. Log off JD Edwards EnterpriseOne
2. Open up MS Word
3. The first thing you need to do is load the XML Source file you just saved to the desktop
4. On the Template Builder Toolbar Select Data / Load XML Data

5. Find the File you just downloaded on your desktop and click Load
6. Click OK when prompted on Data Loaded Successfully window

7. Now that the XML source has been loaded you can now begin to create your Template
   
   **Add Picture as Logo**
   
8. In MS Word Click Insert / Picture / From File
   
9. Select Picture from My Pictures Directory and Click Insert
10. Click on the Picture
11. Click the Center Icon to center the picture

12. Click to the right of the picture and click Enter a few times to move cursor down page a few lines
13. Click File / Page Setup

14. Click Landscape
15. Click OK
16. Click File / Save

17. Use File Type Drop Down and Select .RTF
18. Name the Document Doc3
19. Click Save

**Add Fields from XML Source**

20. On the Template Builder Toolbar in MS Word Select Insert / Table Wizard
21. Ensure the Table Radio Button is Selected
22. Click Next

23. Use the drop-down for Data Set and select the last line
24. Click Next

25. Click AddressNumber ID2
26. Click Right Arrow
27. Click NameAlpha ID4
28. Click Right Arrow
29. Click CurrencyCodeFrom ID6
30. Click Right Arrow
31. Click Next

32. Click Next (We aren't going to group any of the fields)
33. Click Next (We aren't going to sort any of the fields)
34. Change the Label for Addressnumber ID2 to Customer #
35. Change the Label for Namealpha ID4 to Customer Name
36. Change the Label for Currencycodefrom ID6 to Curr
37. Click Finish

38. Click Save
39. On the Template Builder Toolbar Click Preview / PDF
40. This is what your PDF report should look like to this point

41. Close the PDF window

Add Chart to Template

42. From the Template Builder toolbar click Insert / Chart

43. Scroll to the bottom of the left Data pane

44. Click and Drag Addressnumber from left pane to into the Labels Area
45. Click and Drag DaysSalesOutstanding from left pane into the Values Area
46. Click and Drag DaysCreditGranted from the left pane into the 2nd Values Area
47. Click OK
