

ORACLE UNBREAKABLE LINUX MIGRATION STRATEGY ACCELERATOR SERVICE

AT A GLANCE

ORACLE UNBREAKABLE LINUX ACCELERATOR SERVICE PROVIDES:

- A specialized deployment team from Oracle;
- Review of your existing environment and enterprise goals;
- An Oracle team to work hand-in-hand with your project team to determine the best migration strategy;
- Documentation of the migration strategy to move you to Oracle Unbreakable Linux program;
- Reduced migration risk by leveraging in-depth product knowledge and the proven track record of Oracle Consulting professionals;
- Transfer of knowledge from highly trained and experienced Oracle Consulting professionals to the customer project team;
- Reduced cost of migration in moving to Oracle Unbreakable Linux program.

ADDITIONAL SERVICES

The following services are also available from Oracle Consulting Services:

- Oracle Real Application Clusters Accelerator Service;
- Oracle Enterprise Manager Accelerator Service;
- Oracle Data Guard Accelerator Service.

Oracle is fully committed to supporting and enabling Linux in your enterprise. Oracle solutions on Linux enable customers, at a fraction of the cost, to benefit from the same high performance, complete reliability and data security realized on proprietary platforms.

Only Oracle makes Linux Unbreakable by providing support for the Linux operating system and by making technical contributions that directly enhance the Linux kernel. With the Oracle Unbreakable Linux program, Oracle is enabling customers to deploy their mission-critical transactional and decision support applications on low-cost Linux servers along with world-class, award winning, global support for Linux. For more information, visit oracle.com/linux.

Oracle Unbreakable Linux Migration Strategy Accelerator Service provides the benefits of Oracle technology, database and operating system migration methodology, and experienced Oracle Consultants to work with your project team to achieve the goals of your organization.

Overview

This service is aimed at enterprises running AIX, Solaris, HP/UX, Windows, Legacy mainframe or TRU64 (1) who are in the process of migrating or planning to migrate from these environments to Enterprise Linux supported by the Oracle Unbreakable Linux program.

Implementing Oracle Unbreakable Linux support involves migrating data from the legacy OS to Enterprise Linux and applying the Oracle “up2date” program. The engagement includes: defining database migration requirements, identifying OS differences, architecting a high performance infrastructure and defining a migration strategy. Oracle Consulting Services delivers experienced, professional resources to help you navigate these complex and diverse tasks to successfully define your operation system migration strategy for your project.

Scope of the Offering

Oracle Consulting is offering a time-bound engagement to help your project team determine the migration strategy to Unbreakable Linux support program. Our highly trained and experienced consultants will work with your team to understand your database and operating system migration requirements. We will review your

existing environment and determine the best approach to migrate your existing database to run on Oracle supported Linux. The strategy is focused on using field-tested migration methods based on your organizational requirements and needs. Together, our consultants and your team will define the best database migration approach from your current operating system. This will include taking full advantage of the capabilities of the Oracle database and options, recommended migration tools, as well as best practices. This will serve to mitigate costs and risks associated with database and operating system migrations. Throughout this engagement the consulting team will involve your team in the migration strategy. This engagement will provide a migration strategy document that will leverage Oracle migration methods to perform:

- Inventory the current configuration and document the process to move existing Operating System configurations to Oracle supported Linux;
- Recommend the database and operating system migration method;
- Review, with your project team, the migration strategy and method to move your enterprise to Unbreakable Linux program.

Requirements

Upon arrival of the Oracle team, it is expected:

- Customer personnel, familiar with your current OS and Oracle environment, will be available to fully participate in the migration strategy sessions;
- Customer technical personnel will be familiar with Linux or have a strong Unix background.

Deliverables

The following deliverables are included within the scope of this service offering:

- A Database Migration Strategy and Requirements document to convey the scope, objective, approach, complexities and risk;
- An Operating System Migration Strategy and Requirements document to convey the scope, objective, approach, complexities and risk.

Getting Started

Using Oracle Consulting allows you to leverage Oracle's methods, tools, and extensive experience gleaned from customer implementations across diverse industries and geographies. Tight integration across Consulting, Development, Support, Education, and Global Delivery puts the entire Oracle team behind your success.
