Electronic Invoicing

Oracle Products

Oracle E-Business Suite

Oracle Application Server

Oracle BPEL Process Manager
Oracle EBS Adapter

DBNeT specializes in providing Electronic Invoicing solutions to address the requirements of the Chilean market.

Partner Overview

DBNeT is a leading provider of Electronic Invoicing solutions in Chile. Their flagship product is Facture, an Electronic Invoicing Module Developed by DBNeT that permits the easy implementation of automatic delivery and reception of electronic tributary documents (DTE, namely Electronic Invoices) in accordance with the norms of the Chilean Internal Revenue Service.

Integration Solution Overview

DBNeT customers want a flexible and localized electronic invoicing solution integrated with an enterprise strength ERP solution. To address this customer need, DBNeT is integrating Fracture, an electronic invoicing solutions with Oracle E-Business Suite Financials modules. The DBNeT integration with Oracle E-Business Suite leverages DBNeT's strengths in electronic invoicing as well as their localized expertise, coupled with Oracle E-Business Suite's strong capabilities in Financials.

Flexible Integration

DBNeT's customers require a comprehensive, secure, reliable Financials solution in accordance with the norms of the Chilean Internal Revenue Service. This solution involves an electronic invoicing component completely integrated with best-of-breed functionality available in enterprise strength Financials solution. Through the Fracture-Oracle E-Business Suite integration, customers gain access to the local expertise available in the fracture solution combined with the robust functionality available in the AR and AP modules of the Oracle eBusiness Suite. Oracle BPEL Process Manager enables real-time bi-directional data integration between Fracture and Oracle E-Business Suite. In addition Oracle Fusion Middleware provides a secure, robust framework for a service-oriented architecture.

Why Oracle?

Oracle Integration with Oracle E-Business suite provides DBNeT customers a comprehensive end-to-end Financials solution completely integrated with an electronic invoicing solution. To maintain its competitive edge, DBNeT needs to provide its customers with a standards-based, highly available, comprehensive, real-time integrated solution. Oracle Fusion Middleware provides DBNeT with a Service Oriented Framework and its customers with enhanced agility and flexibility to respond to the changing business environment.

Essential Benefits

- SOA-based integrations help customer integrations to be adaptive and lower TCO (deployment, upgrades)
- Provides customers a holistic financial management solution, including electronic invoicing functionality, addressing local end-to-end business process requirements
