- CXO Milletech Systems Inc

Milletech Systems Inc is leading provider of Effort Reporting Systems and an extremely dynamic organization that offers a range of unique services, products, and solutions to the Higher Education industry.

Partner Overview

Milletech Systems Inc is a leading provider of effort reporting system to leading higher education institutions across North America. Milletech Systems ReARTS provides research administrators a powerful financial analysis tool to derive better business insights for accuracy, a competitive advantage and compliance purpose.

Integration Solution Overview

Bentley's customers are looking for a comprehensive enterprise linear asset management system with built in integrations with Oracle E-Business Suite. Optram lets customers capture and manage information about linear assets such as rail, track, ties, ballast and, track condition indicators, geometry, inspection, still imagery and CAD drawings, and lets customers create, manage and track work orders on these assets. Oracle E-Business Suite maintains work history and work plans for the resources and also maintains the master information for all the assets.

Bentley teamed up with Oracle to provide their customers with additional capabilities such as real time work order management, project cost analysis and cost projections by building real time integrations with the ERP and EAM systems. Optram's state of the art analytical engine enables customers to get accurate costs related to projects while Oracle's E-Business suite maintains and manages key data related to assets, time and labor.

Flexible Integration

Bentley's customers require a secure, reliable, and scalable linear asset management solution that is integrated with Oracle E-Business Suite and is easy to manage and maintain. With Optram/Oracle E-Business Suite integration, customers gain greater flexibility, as well as a truly comprehensive linear asset management solution. Oracle Fusion Middleware glues these applications together by leveraging BPEL PM for orchestration and web services management. In addition, Oracle Fusion Middleware provides security, reliability, and high availability through its unbreakable, services-oriented architecture.

Why Oracle?

Bentley has recognized that Oracle's E-Business Suite is important component of their customers' business solutions. As an ISV, Bentley recognizes the need to provide their customers with standards-based,

integrated solutions that are easy to manage and maintain. Bentley has chosen Oracle Fusion Middleware to provide a reliable and flexible framework to create and manage a secure, service-oriented solution for their customers.

Essential Benefits

- Provides a complete linear asset management solution for customers by integrating with Oracle E-Business Suite providing end-to-end business processes.
- Improved process management through use of BPEL PM and the OFM tools offering greater flexibility with integrations.
- Superior exception-handling capabilities of BPEL for better diagnostic ability.
