“We are excited to be working with Oracle to provide customers with enterprise-class on-demand procurement automation, supplier enablement and management solutions that deliver significant ROI and sustain long term value catering to the requirements of the Higher Education, Health Care and Life Science markets. Leveraging Oracle Fusion Middleware, our integration with Oracle E-Business Suite and PeopleSoft is seamless and optimized to provide a user experience that meets the spending management needs of our customers.”

Stephen Wiehe
President & CEO
SciQuest Inc

Partner Overview

SciQuest provides an on-demand, web-based, modular suite of supplier management, procurement automation and materials management solutions tailored for the Higher Education, Life Science and Health Care markets. SciQuest's solutions integrated with Oracle E-Business suite and PeopleSoft enterprise improve user adoption and productivity, promote contract compliance and increase spend visibility. SciQuest's flagship product suite -- HigherMarkets (for higher education) and SelectSite (for Life Sciences and Healthcare) – in conjunction with Oracle's E-Business Suite and PeopleSoft Enterprise deliver a comprehensive, on-demand procurement automation and supplier management solution greatly improving spend management across an institution or a corporation.

Integration Solution Overview

Customers are taking advantage of SciQuest's partnership with Oracle to integrate SciQuest's on-demand catalog management tools with the Oracle and PeopleSoft procurement systems, making SciQuest's solution a robust and comprehensive procurement automation solution. SciQuest chose Oracle Fusion Middleware to integrate the HigherMarkets/SelectSite suite with Oracle's e-procurement solutions. This enables Oracle iProcurement and PeopleSoft eProcurement users to search through SciQuest's hosted and punch-out catalogs, build their shopping carts with items chosen from the catalogs, and place an order from within their Oracle or PeopleSoft procurement systems. A SOA web services-based interface built using Oracle BPEL integrates HigherMarkets and SelectSite, providing a seamless user experience.

Flexible Integration

SciQuest's customers are looking for an on-demand, reliable and highly integrated, 'paperless' e-procurement solution with integrations into Oracle, PeopleSoft, and JDE. An on-demand multi-tenant environment demands a robust, secure and highly scalable architecture to reduce failures. Oracle Fusion Middleware combined with its industry leading architecture provides a reliable, scalable platform integrating HigherMarkets and SelectSite with Oracle's e-procurement solutions for serving SciQuest's customers.

Why Oracle?

The SciQuest/Oracle solution is a co-developed, co-implemented, co-supported, complete procurement solution that spans Oracle Business Suite 11.5.9, 11.5.10, 12.x as well as PeopleSoft 8.4, 8.8, 8.9 and 9.x. The solution provides a foundation on Fusion Middleware for Oracle Business Suite and PeopleSoft. With a full service implementation approach and clear upgrade path to the future, the customer will be able to leverage their Oracle/PeopleSoft investments. At the same time, they can effectively extend Oracle/PeopleSoft Applications while SciQuest's Managed Services ensures continuous management of the customer's supplier community.

Essential Benefits

- The integrated solutions create a Faster ROI - 5-20% savings on every dollar under management and 80%+ contract compliance after solution deployment
- Integrates and synchronizes procurement activity between SciQuest and Oracle | PeopleSoft Systems drives adoption through an optimized user experience - One source to find all products
- SciQuest highly integrated managed supplier services reduces costs by enabling a critical mass of suppliers, minimizing non-contract and off-catalog spending
