## Industry

Healthcare

## Oracle Products

Oracle E-Business Suite  
 Oracle BPEL  
 Oracle EBS Adapters

*Around the world, health organizations ranging from single-doctor practices to entire countries turn to Cerner for powerful yet intuitive solutions.*

## Partner Overview

Cerner is the leading U.S. supplier of healthcare information technology solutions. Around the world, health organizations ranging from single-doctor practices to entire countries turn to Cerner for powerful yet intuitive solutions that optimize clinical and financial outcomes. Cerner offers clients a dedicated focus on healthcare, an end-to-end solution and service portfolio, and proven market leadership

## Integration Solution Overview

Advanced information systems are one of the most important ingredients for transforming healthcare and overcoming the many challenges healthcare providers face today. Traditionally, the most advanced IT systems often have been beyond the reach of many healthcare organizations due to the complexity and cost involved in implementing, integrating, managing and supporting these systems. Cerner understands the resource challenges and constraints faced by health services providers and is addressing many of those challenges by offering pre-configured *Cerner Millennium*® modules integrated with Oracle E-Business Suite as part of Cerner's Remote Hosting Option (RHO). RHO allows community and rural hospitals to use the most sophisticated and powerful applications available today. Integrating *Cerner Millennium* with Oracle E-Business Suite improves the quality of clinical care while driving down costs by creating business processes across patient care, inventory, human resources and financial management applications.

## Targeted Integration

By developing integration that is both targeted and flexible, Cerner helps clients eliminate the time and expense of designing and building the integration. Oracle E-Business Suite, integrated with *Cerner Millennium*, provides an end-to-end solution that enables healthcare providers to improve patient care, improve quality, reduce costs, and increase productivity. Finally, all health services organizations can take advantage of the wide-ranging benefits of advanced administrative, clinical and patient care systems.

## Why Oracle?

With a shared vision, Oracle and Cerner solutions perfectly complement each other

to provide a seamless, unified suite of clinical solutions on a common technology stack. Oracle Fusion Middleware provides a comprehensive, standards-based, easy-to-use solution for creating, deploying, and managing cross-application business processes with both automated and human workflow steps. The Oracle BPEL Process Manager provides process portability, flexibility, and visibility into crucial business processes.

### **Essential Benefits**

- Increases productivity of healthcare providers by eliminating administrative tasks associated with redundant manual entry
- Reduces costs by automating the flow of information from the clinical applications to financial and inventory management applications through flexible business process models
- Ensures accuracy and speed in cost recovery
- Allows healthcare professionals to focus on patient care
- Enables better decision making with real-time access to more accurate information across clinical, financial and supply chain systems
- Provides the ability to improve business processes
- Lower total cost of ownership, reducing implementation time and cost
