Oracle and G-Log

Acquisition Announcement –
Customer and Partner Presentation
September 20, 2005

Disclaimer

- This document is for informational purposes only and may not be incorporated into a contract. The proposed transaction is subject to regulatory approvals and other closing conditions.

Agenda

- What We Are Announcing
- Strategic Rationale
- Anticipated Benefits to Customers and Partners
- Background on G-Log
- Combined Solution and Post-transaction Operating Plan

What We Are Announcing

- Oracle has agreed to acquire Global Logistics Technologies, Inc. (“G-Log”)
 - Terms undisclosed
 - Transaction expected to close in Fall 2005
- About G-Log
 - Leading provider of logistics and transportation management solutions used globally to automate the flow of goods and information
 - G-Log’s GC3 (Global Command and Control Center) is a segment leading solution
 - Marquee customers in multiple key industries: retail, manufacturing, and logistics service providers
 - Approximately 180 employees
 - World-class talent with deep domain expertise across R&D, sales and services

Strategic Rationale

- Logistics and transportation management is a large, growing segment with attractive dynamics
 - Globalization, high fuel costs, supply chain complexities and capacity issues are driving increased requirements for logistics solutions
 - Logistics service providers and shippers are looking to standardize IT platforms
- G-Log has proven segment leadership and world-class capabilities
- Creates platform for Logistics Hub solution for Fusion infrastructure
 - Combination extends Oracle's logistics footprint
 - Complementary products in an integrated solution for planning, optimization, execution and analysis
 - Most compelling, comprehensive applications / infrastructure logistics and transportation offering for combined customers
 - Compatible with Oracle's Fusion application and technology strategy
- Complementary customer base provides immediate benefits
 - G-Log products built on Oracle database
 - Over 50% of G-Log customers own Oracle applications

Anticipated Mutual Customer Benefits

- Compelling integrated Logistics Hub solution with significant benefits to customers
 - Enhances ability to manage and optimize transportation across complex networks
 - Solves critical logistics requirements more comprehensively
 - Reduces complexity, time to benefit, and overall cost of ownership
- Effectively addresses evolving customer needs by harnessing the talent and resources of combined companies
 - Respond to carrier and shipper pressures, and industry trends that are driving the demand for complex, comprehensive logistics solutions
- After transaction closing, G-Log customers' investments will be supported by Oracle's global resources and infrastructure
 - Continued focus through dedicated, expanded teams within Oracle
- Facilitate transformation of customers' logistics operations to leading-edge infrastructure that improves competitive advantage

Anticipated Mutual Partner Benefits

- Broaden existing ISV and developer partnerships and establish new partnerships to complete combined footprint
 - Oracle to deliver an end-to-end solution for logistics planning, optimization, execution and analysis
 - Solidified long-term technology and application strategy for logistics
- Opportunity for SIs specializing in logistics and transportation to provide world-class solutions to customers across multiple industries
 - Expanded application footprint offers additional opportunities for partners
 - Strengthened go-to-market capabilities through Oracle's global sales force

Industry Pressures Drive Need for Advanced Logistics Solutions

Compelling Combined Solution

- Combination extends Oracle logistics and transportation management footprint and creates platform for a comprehensive Logistics Hub solution for Fusion infrastructure
 - G-Log: Best-in-class logistics planning, optimization, execution and analysis software
 - Oracle: Enterprise and supply chain management applications, middleware and database technologies
- Seamless integration of Oracle and G-Log solutions
- Shared vision and aligned strategies based on industry standards
 - G-Log products have been built on Oracle's database
 - Readily compatible with Oracle Fusion infrastructure
- Deep roster of talent focused on logistics
- Global reach and resources

Comprehensive Logistics Footprint

Post-transaction Operating Plan

- G-Log team to lead Oracle's efforts in logistics and transportation
 - Draw on proven expertise and success
- Integrate G-Log staff into Oracle functional organizations
 - Create specialist teams to maintain focus
- Develop seamless integrations between G-Log, Oracle E-Business Suite (EBS) and Oracle Retail (Retek) products
- Continue to sell G-Log products as (i) standalone offering, (ii) hosted, and (iii) as an integrated transportation management offering for EBS or Retek
- Continue to support existing users of Oracle Transportation Execution and Oracle Transportation Planning
- Draw on Oracle infrastructure to support and expand G-Log products globally

Next Steps

- General announcements – Tuesday, September 20
 - Press release
 - Outreach to customers and partners
- Complete acquisition
 - Closing anticipated in Fall 2005
