Oracle Buys Passlogix

Adds Enterprise Single Sign-On and Network Authentication Capabilities to Oracle's Identity Management Suite

October 29, 2010

Oracle is currently reviewing the existing Passlogix product roadmap and will be providing guidance to customers in accordance with Oracle's standard product communication policies. Any resulting features and timing of release of such features as determined by Oracle's review of Passlogix's product roadmap are at the sole discretion of Oracle.

All product roadmap information, whether communicated by Passlogix or by Oracle, does not represent a commitment to deliver any material, code, or functionality, and should not be relied upon in making a purchasing decision. It is intended for information purposes only, and may not be incorporated into any contract.

What We Are Announcing

- **Oracle buys Passlogix**
 - Adds enterprise single sign-on (ESSO) and network authentication capabilities to Oracle's Identity Management Suite
 - The transaction has closed
- **About Passlogix**
 - Privately-held company, based in New York, NY
 - Products help improve and simplify security by enabling SSO for broad range of applications including client-server, mainframe, desktop and web
 - Selected by marquee companies across multiple industries including Communications, Financial Services, Government, Healthcare and Retail
- **Combination of Oracle and Passlogix is expected to enable enterprises to further advance their identity management, compliance and authentication initiatives with even tighter integration capabilities**
 - Builds on successful 3+ year OEM relationship to incorporate best of breed ESSO capabilities into Oracle's comprehensive access management suite
 - Capitalizes on customer driven requirements for tight, out-of-the box integration across access management and security components
 - Delivers on market requirements for advanced security through strong authentication, enhanced privacy, and regulatory compliance

Strategic Importance to Oracle

- **Organizations require a comprehensive identity and access management solution to improve security throughout the entire identity lifecycle**
 - Driven by regulatory mandates such as Sarbanes-Oxley and other legislation, enterprises are being pressured to provide stronger authentication mechanisms
 - Key business need is simple, secure access to all applications – including client-server, mainframe, desktop and web based applications
 - Passlogix technology together with Oracle addresses this need today with authentication, better password management and compliance
- **Acquisition of Passlogix allows for deeper integration and better alignment of our technologies for a more comprehensive ESSO offering**
 - Increased investment in ESSO product features and ease of use to demonstrate strategic importance to customers
 - Introduce capabilities such as strong network authentication that supports a variety of credential types – improving security while providing more user flexibility
 - Invest in support for modern architectures and devices with support for mobile devices, cloud deployment architectures and newer browsers – promoting agility
- **The combination is expected to provide enterprises with a complete identity management solution and enterprise-scale single-sign on capabilities**

Passlogix Solution

Unique, market-leading SSO Solution

Enterprise-Grade Scalability

- Seamlessly leverages existing IT infrastructure and processes
- Several global customer deployments to more than 100,000 users

Just-In-Time Deployment

- Eliminates common deployment issues
- Brings together user convenience and security

Strong Network Authentication

- Replaces Windows password with strong authentication with no new infrastructure
- Strengthens security and compliance

Flexibility & Integration Breadth

- Delivers single sign-on access to virtually any application using simple, template driven wizard

Out-of-the box Integrated Solution

Enterprise Single Sign-On to Any Application - Anytime, Anywhere

Oracle Access Manager

- Seamless sign-on, session management for enterprise and web applications

Oracle Identity Manager

- Enterprise level control of credentials and seamless provisioning to applications

Oracle Internet Directory

- Out-of-the box support for the industry's most scalable, high performance directory server

Expected Benefits for Customers

Unique ESSO technology for identity management

- Supports single sign-on and sign-off to any application
- Supports multi-level authentication to any application
- Securely bridges between any form of user-authentication, application authentication, credential type, and identity and access management solutions
- Does not require additional hardware or infrastructure to deploy
- Does not require modifications to applications

Passlogix's product complements Oracle's Identity Management Suite

- Creates a seamless single sign-on solution across all enterprise applications, regardless of application type
- Delivers visible, quick value to users through harmonized and simplified password policies
- Improves security with simple and secure access to all applications
- Manages and controls application credentials so users never know or touch them
- Tracks and reports on all application use on a per user basis

Select Passlogix Customers

Leading Global Retailer

- Streamlining application sign-on for more than 40,000 executive and back office employees
- Securing desktop and service account administration
- Reducing system lock outs for distribution centers

Large US Federal Agency

- Delivering SSO access to thousands of applications
- Extending PIV card authentication to provide easy application access and automated password entry
- Reducing password related help desk costs

National European Healthcare Organization

- Securing access to patient medical records using National ID card for authentication
- Simplifying access for care providers on shared workstations

Fortune 500 Financial Services Firm

- Simplifying application access for 50,000 users
- Reducing password related help desk costs
- Extending identity management benefits and simplifying two factor network authentication

Multi-National European Utility Company

- Simplifying access to dozens of applications for more than 20,000 users
- Securing access for mobile workforce
- Minimizing integration and deployment costs

US Regional Healthcare Provider

- Extended Secure SSO for care providers from any machine
- Addressed HIPAA Compliance requirements on shared workstations

Case Study – US Postal Service

Reduced Help Desk Calls and IT Costs

Business Challenges

- Estimated 1000 password-related help desk calls per day
- Typical user had to remember and manage 10 unique identities
- Weakened security as users resorted to selecting easy passwords and/or writing down passwords on sticky notes
- Number 1 USPS end user problem: forgotten passwords

Product Solution

- Passlogix v-GO SSO and v-GO SSPR

Results

- Password-related help desk calls reduced from 1,000 per day to 10
- Deployed more than 165,000 users in less than 12 months
- Most users embraced the solution with minimal training
- Password security significantly enhanced
- Lowered support costs

Case Study – Panera Bread

Improving Productivity and Security across their Enterprise

Business Challenges

- Multiple managers sharing one desktop PC without a SSO
- Secure and simple access to 3rd party applications
- Users needed a means to easily access desktop applications with single password
- Third party websites have insecure login scenarios, a high risk in the retail industry

Product Solution

- Passlogix v-GO SSO and v-GO SSPR

Results

- Allowed both SSO users and non SSO users to access functions on their PC
- Created easier one login password for users
- Simple and secure access to 3rd party sites with one login that acts as a key to access all credentials they would need
- Automatic credential updates improved administrative tasks

Passlogix + Oracle

A Compelling Combination

- ✓ **Passlogix and Oracle are expected to continue providing customers with market-leading capabilities in identity and access management solutions**
- ✓ **Passlogix and Oracle have a shared vision on providing customers with an integrated solution that helps advance and improve security throughout the identity lifecycle**
 - Passlogix and Oracle have been partners for over 3 years and have many of the same customers
 - Passlogix products already integrate with Oracle Identity Manager, Oracle Access Manager and Oracle Internet Directory
- ✓ **Together, Passlogix and Oracle will be able to provide more global reach and support resources to customers**
