Catholic Healthcare Partners Ensures Best Practices and Reduces Human Resources Management Costs with Centralized IT Platform

Catholic Healthcare Partners (CHP) is the largest health system in Ohio and one of the largest nonprofit health systems in the United States. It operates 34 hospitals in nine geographic regions to meet the healthcare needs of people in Ohio, Tennessee, Kentucky, Pennsylvania, and Indiana.

Challenges and Solutions

Each of CHP's hospitals joined the group with its own human resources information system platform, making it difficult to assess staffing needs across the organization and hindering the implementation of a shared services model. CHP standardized on Oracle's PeopleSoft Enterprise Release 9.1 human capital management applications. It is creating a centralized HRIS infrastructure that is saving US\$200,000 annually in payroll labor and transactional costs. The organization is also reducing benefits administration support staff and improving regional collaboration around best practices.
