Disrupting Human Capital Management: The New Emerging Digital Standard for HR

MODERN HR IN THE CLOUD

The rise of cloud technology has fundamentally transformed the way organizations do business. By the year 2020, an entire generation will have grown up in a primarily digital world. Computers, mobile phones, and social networking will be second nature to them. Their lives will be driven by digital services and applications.

How are cloud technologies disrupting human capital management?

What's moving to the cloud first?

THE NEW DIGITAL USER EXPERIENCE

Modern consumer user experiences are now reshaping the future of work: how we shop, how we consume content, how we work. Mobile now exceeds PC internet usage and it has forever changed how we interact with the internet, mobile phones, texting, social networking—all will be second nature to them.

By the year 2020, an entire generation will have grown up in a primarily digital world. Computers, mobile phones, and social networking will be second nature to them. Their lives will be driven by digital services and applications.

MODERN HCM IN THE CLOUD

Transforming the way organizations will do business well into the future.

With 60 percent of CEOs indicating that cloud computing is strategically important for their business, it's easy to see that the cloud is more than a simple trend and is fundamentally transforming the way organizations manage, enable, and engage their workforce.

What's the ROI of going to the cloud?
