

Oracle Student Management

Higher Education institutions today are beset by change: “traditional” students are no longer the majority as learners seek to balance their higher education goals with ongoing work and other responsibilities; besides “traditional” academic structures like terms, outcomes, and even the type of learning opportunities offered from programs to courses to workshops, are taking on a new flexibility to meet those students’ needs. At the same time, institutions are being asked for greater accountability and deeper insight into the progress and outcomes of the students they serve. And all of this at a time when IT and infrastructure costs are rising on campus. New solutions are needed to meet the new face of Higher Education catering to a diverse array of academic learning events.

A MODERN STUDENT EXPERIENCE

Today’s students have an expectation of a simplified and intuitive user experience using technology that mirrors the consumer and social applications that comprise of their online interactions. Oracle Student Management Cloud has been architected from the ground up as a student-centric offering, with functionality and presentation that starts with “what does the student need to do” and only then follows up with “what needs to happen behind the scenes to help them do that.”

Student Management allows students to:

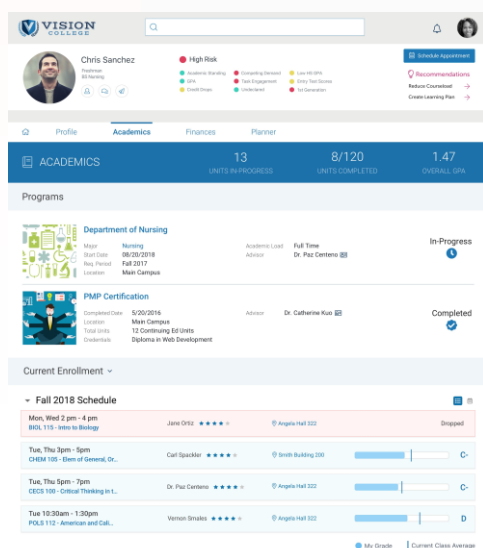

- Self-create an account: no waiting on paperwork or administrator data entry, students can create an account, find a diverse array of learning programs and enroll all in one sitting.
- Find learning opportunities (e.g., courses) using modern search paradigms: from intelligent type-ahead searching to curated postings like trending and highlighted courses to the use of configurable facets and filters to narrow results, students can quickly and easily find their way to just the right class.

Key Features

- Foundation to support the spectrum of Higher Education business models both Continuing Education as well as traditional models
- Innovative consumer-style course search/learning discovery
- Easy to use Online Enrollment, including support for simplified Pay to Enroll checkout
- Built in social collaboration tools for classes
- Streamlined guided setup of curriculum, courses and programs
- Support for flexible time periods
- Assess student fees with a variety of discount options
- Student user account self creation for immediate enrollment
- Admissions support, detailed academic statistics, enrolling in a learning package, and corporate sponsored courses

- **Enroll and Pay-as-You-Go:** students want to enroll and get started; you want to get students enrolled. With a streamlined business process and point and click interface, students can quickly progress through finding their class (including the number of open seats), adding it to their cart, and paying for it. Students get quick access to the learning they need, and institutions instantly see the status of enrollments and the financial viability of offerings.
- **View their courses:** with one click view meeting times, credits, location (with embedded mapping) and more in a handy at-a-glance format.
- **Manage their finances:** students can always know their financial situation with direct access to view and manage their individual account.

My Academics.

BUILT FOR STUDENT AND INSTITUTIONAL SUCCESS

Educational paradigms are changing fast. Concept like termless offerings, self-paced learning, competency-based education, badging, etc. all point toward a need for schools to support the administration of new models of learning and assessment demanded by today's students and their future employers. Student Management's flexible Curriculum Management module allows you to define and manage the full breadth of your offering from traditional degree-oriented coursework to one-off continuing education classes. To support the flexibility, institutions require to support all types of educational models.

ALL DEVICES, SAME EXPERIENCE

Students expect to be able to access their data and undertake tasks any place, any time. Built using responsive mobile design tools that allow the application to adjust to fit any device a student may be using – from desktop to tablet to smart phone – users can access Student Management whether they're in their dorm room, at work or on the go.

INTEGRATED STUDENT CLOUD – PRACTICAL PATH TO THE CLOUD

Today's student's want meaningful engagement with every interaction and empowerment to act on their own at the time and through the channel of their choosing. They also now expect that every process should be delivered in a frictionless experience. Oracle Student Management is a key

Key Business Benefits

- Improves student and guest learner experience with a configurable consumer-oriented interface

component of Oracle Student Cloud that brings together world class customer experience capabilities to the institution, not just integrated harmonized for engagement and empowerment eliminating friction points at every step.

Oracle Student Cloud consists of a suite of modules such as Oracle Student Management Cloud, Oracle Student Financial Planning, Oracle Student Recruiting and Oracle Student Engagement. It has been built natively in the cloud from the ground up and is modular by design to work together as a suite. Institutions are able to choose their own incremental path to the cloud and can decide when and what modules to adopt first.

Oracle Student Financial Planning powers financial aid professionals to manage each student's financial plan individually, automatically and in real-time, providing visibility into a students' entire program – supporting better informed financial decisions and optimized outcomes.

Capabilities such as Oracle Recruiting Cloud, and Oracle Engagement Cloud are not just integrated, but capabilities are embedded throughout Student Management to provide unmatched insight and a seamless experience.

ORACLE HIGHER EDUCATION

Ultimately, your student information system is only one element in your campus enterprise. That's why Student Management is fully integrated into the larger Oracle Cloud enterprise suite, including Oracle HCM Cloud and Oracle Cloud Financials. From managing your employees and assigning instructors to classes, to managing your students' accounts and providing easy payment processing during the enrollment process, Oracle products work together to provide you with all the tools you need to serve your most important customers: your students.
