

Oracle Health Insurance Data Capture

KEY FEATURES

- Validation rules, including data masking, date, range and required fields capabilities
- Reflexive questioning automatically chooses questioning sequence
- Knockout questions disqualify applicants early and automatically
- Fully customizable questions

KEY BENEFITS

- Improves distribution management with single entry and streamlined processes
- Improved quote-to-sale ratios
- Reduces application processing time and cost
- Ease of integration with rating and policy administration systems promotes straight-through processing
- Reduces training time for new sales person and broker
- Reduces underwriting costs and sales overhead

Oracle Health Insurance Data Capture is a web based solution that can help healthcare payers during the “rate, quote, bind and issue” process. It provides front-end tool for Oracle Health Insurance Enterprise Rating to generate quote for applicants, health plan sales representatives, brokers and other external stakeholders.

Intelligent, Rules-based Data Capture for Payers

Oracle Health Insurance Data Capture is a Web-based application that eliminates redundant entry for applicants, sales representatives, brokers, and other stakeholders. The solution interjects underwriting rules into the application process, helping you automate the first step in the rate-quote-bind workflow.

Oracle Health Insurance Data Capture collects applicant data using an intelligent, rules-based interview approach to disqualify applications or pass them on to the next stage of underwriting. It streamlines and automates the processes of underwriting.

Payers can create all its own custom questions unique to its application process. Questions can be added, removed, or edited at any time. Additionally, the rules-based workflow for questioning sequence is completely customizable, and can be modified for each line of business.

Put Underwriting Expertise to Better Use

Oracle Health Insurance Data Capture can be used to reduce quote cycle time by embedding some of the underwriting rules during the application process to provide faster decision time.

Intelligent, reflexive questioning asks only the appropriate questions per applicant, while knockout questions automatically disqualifies some applicants. These automated features allow sales representative to focus more time on better risks and other new business.

Improve Data Accuracy and Streamline Processes

Oracle Health Insurance Data Capture provides a consistent rating experience across all your sales channels and removes the need for duplicate data entry. It tracks applications for accuracy and completeness and provides straight-through processing for common risk types. This eases the workload on underwriters, freeing them to work on high risk/high reward products or complex cases.

Open Architecture for Easy Integration

Oracle Insurance recognizes the importance of open architecture to facilitate seamless integration with proprietary and third-party systems. The easy integration capabilities of Oracle Health Insurance Data Capture helps payers enable Web portals for all its channels, even giving them the power to create a direct channel for customers. Oracle Insurance Data Capture makes it easier for internal and external stakeholders to do business with and increase payers' competitiveness in the market.
