Oracle Healthcare Health Resources Management (Global) Solution gives you the ability to improve operational efficiency and deliver high quality care by effectively managing human capital, planning, budgeting, and reviewing, minimizing clinical and corporate risk and optimizing utilization of enterprise resources. As your hospital, provider network or health system faces vertical integration pressures, there is an increasing need to focus on human capital management, assets management, materials management, finance, inventory, performance and service line costing, regulatory compliance and other support services.

Oracle Healthcare Health Resources Management (Global) Solution helps you to manage and monitor the financial and operational performance of healthcare services.

Oracle Healthcare Health Resources Management (Global) Solution Highlights

In today’s environment, provider organizations are under increasing pressure to recruit talented staff, manage risk, drive cash flow, contain and reduce costs, and improve profits. Oracle Healthcare Health Resources Management (Global) Solution helps your organization deploy and manage resources effectively and set meaningful performance goals to achieve operational efficiency. In response to the need for work-force excellence and business and clinical efficiency, a fully integrated, comprehensive talent solution, from recruitment to succession planning is available for internal and external applicants, including competencies, such as licenses and experiences, and a supplier relationship management system to reduce cost of hospital supplies and human capital.

Oracle Healthcare Health Resources Management (Global) Solution helps drive economies of scale and complete faster transaction processing at lower cost through collaboration to obtain better buying decisions and waste reduction by supporting lower stock holding. Provider organizations gain the ability to deliver enhanced supply chain management efficiency and visibility as well as meet compliance and regulatory requirements for business and clinical functions and mandatory staff training.

Oracle Healthcare Health Resources Management (Global) Solution supports ad hoc analysis by combining service delivery costs and patient revenues by service line
and enabling accurate analysis of costs and margins delivering a single source of truth. Reports deliver historical data, trend data, or drill-down data through customized dashboards. Oracle Healthcare Health Resources Management (Global) Solution provides benefits that help organizations advance their strategic and operational objectives and drive value through resource utilization planning, budgeting, costing, and analytics.

**Oracle Healthcare Health Resources Management (Global) Solution Supports Health Reform**

- **Accountable Care Organizations**: Providers are tasked with delivering annual cash-releasing benefits by reducing human capital and administrative costs, purchasing costs, cycle time, and improving inventory control to support delivery of new service models with higher quality of care at lower cost to support patient-centric care management experiences.

- **Meaningful Use**: Provider organizations have economic incentives for adopting healthcare information technology. Discharge planning and post-acute engagement are essential to effective resource utilization and improved patient outcomes.

- **Cost Capture**: It is now critical to a provider’s survival to understand their resource utilization by service line, and to have reliable insight and intelligence on administrative and care delivery costs. With reliable timely information, providers can make better decisions and optimize patient experiences. Essential tools include seamless monitoring & reporting of critical metrics across clinical & business functions, including analytics and workflows to drive operational efficiency.

  - Contract Management

- **Enforce Policy Compliance**
  - Supplier Performance
  - Supplier Network
  - Supplier Portal
  - Logistics
  - Orders
Why Oracle Healthcare Health Resources Management (Global) Solution?

Accountable Care Delivery
Increase patient/citizen engagement, accountability and outcomes with seamless front-end service delivery models and improve operational efficiency with adoption of shared services centers generating 25-45% saving in “back-office” functions such as human resources, supply chain and financial management.

Improved Quality of Care
Maximize resource utilization by proactively identifying and enrolling consumers in appropriate health management programs to optimize care by extending care beyond traditional boundaries and providing care throughout the entire care life cycle, addressing chronic populations with active long term care.

Lower Cost of Care
Reduce cost of transaction processing, streamline business processes, and improve data quality to gain improved visibility, insight and intelligence for optimization of workflows and processes. Gain integrated view of business and clinical systems.

Resource Utilization and Performance Analytics
Maximize income – patient billing, grant, funding, automation in payments (wages, suppliers). Deploy tools for measuring & reporting both clinical & operational metrics at the service line level for improving patient outcomes, enhancing operational efficiency and gaining enterprise-wide visibility.
