

# ORACLE APPLICATION INTEGRATION ARCHITECTURE FOUNDATION PACK EXTENSION FOR INSURANCE

## KEY BENEFITS

- Integrates Oracle, Third-party or custom developed applications
- Speeds time to value with pre-built insurance objects and services
- Helps optimize business operations using documented insurance business processes
- Minimizes integration cost and risk

*Oracle Application Integration Architecture (AIA) Foundation Pack enables you to simplify cross-application business process integrations using a standards-based, prebuilt integration solution. Designed to promote rapid deployment, re-usability, and configurability of business processes, AIA Foundation Pack saves significant time, effort and cost in building and managing process integrations while enabling the value of a Service Oriented Architecture (SOA) at an accelerated pace.*

*AIA Foundation Pack Extension for Insurance complements Oracle's Foundation Pack solution by providing pre-built industry specific content to optimize business processes that are unique to your business. Together, AIA Foundation Pack and Foundation Pack Extension for Insurance provide a comprehensive solution for building sustainable, agile composite applications.*

### **Leverage a Documented Insurance Business Process Model**

As part of the AIA Foundation Pack Extension for Insurance, we deliver an insurance business process model that describes the generally accepted industry processes across core operational areas within an insurance company, such as sales, new business and claims. You can compare your current processes to Oracle's business process model before embarking on IT projects.

### **Create Flexible Integrations Using a Canonical Model**

Oracle AIA Foundation Pack includes application independent Enterprise Business Objects (EBOs) and Enterprise Business Services (EBSs), a standards-based reference architecture, programming methodology, and lifecycle governance tools, allowing you to create flexible business process integrations across your Oracle and non-Oracle applications. These integrations can be easily modified or configured, allowing you to respond quickly to business and customer requirements changes.

### **Jump Start Your Integrations with Pre-built Insurance Objects**

To help you accelerate your integration implementation, AIA Foundation Pack Extension for Insurance includes pre-built EBOs for claims, insurance applications, insurance policies, insurance plans and more. In addition to the industry-specific EBOs, insurance-specific enhancements to cross-industry EBOs also are included. Together, these pre-built, insurance-specific objects and enhancements help you speed time-to-value for insurance systems integration and minimize cost and risk.

### Built on Fusion Middleware

Oracle Application Integration Architecture is built on Oracle Fusion Middleware's market leading SOA and BPM products. These products deliver a comprehensive SOA & BPM infrastructure for connecting heterogeneous applications and business partners, managing structured and unstructured business processes and advanced management via a unified framework for governance and monitoring. ### Bottom Line

Oracle Application Integration Architecture Foundation Pack and AIA Foundation Pack Extension for Insurance enables IT organizations to orchestrate agile, user-centric business processes across heterogeneous enterprise applications, at reduced risk and lower total cost of ownership.

With Oracle Application Integration Architecture Foundation Pack Extension for Insurance, you can:

- Use Oracle's documented insurance business process models to increase business efficiency and begin building SOA applications to maximize your return on past IT investments
- Create flexible, upgradeable integrations using application-independent objects and services tailored to the insurance industry.
- Create durable integrations across Oracle Applications, third-party and custom developed solutions, unifying your application portfolio. These integrations are less expensive because they use SOA and are built using the foundation pack artifacts
