ORACLE
Hospitality

TAKING HOTEL E-COMMERCE TO THE NEXT LEVEL

KEY FEATURES

- Responsive design
- Customizable templates
- Content-rich, personalized experiences
- Targeted promotions
- Seamless booking and reservations functionality
- E-mail communications
- Support for multiple languages
- Availability Calendar

KEY BENEFITS

- Optimized for conversion
- Create personalized experiences for guests
- Provide targeted marketing initiatives
- Upgrade the guest by offering packages and ancillary services

Oracle Hospitality Web Booking Engine is a state-of-the-art e-commerce platform to leverage hotel and customer data from Oracle Hospitality OPERA Cloud and OPERA Property to attract, persuade, and convert online travel consumers.

The experience manager enables you to create, manage and deliver content-rich, personalized experiences in order to increase conversion rates and accelerate sales.

Serving smart content to customers based on their web origins, history, and preferences, Web Booking Engine addresses every phase of the buying funnel. The result is a truly integrated web presence that drives revenue and makes your hotel more competitive.

Template Design Customization

Web Booking Engine Cloud Service is a responsive design allowing hotels to provide an optimal viewing experience, easy reading and navigation across a wide range of devices – from desktop computer monitors to mobile phones and tablets.

Oracle Hospitality Web Booking Engine Cloud Service provides one out-of-the-box design template that offers a choice of design styles. The template can be customized using images, rich media, and a variety of color and font motifs to project the unique brand and personality of the hotel.

Experience Manager

The Experience Manager tool within Oracle Hospitality Web Booking Engine Cloud Service enables hoteliers and website managers to create personalized experiences for guests. The tool leverages two kinds of information—anonymous clickstream behavior (that is, how a user moves from the organic search or from an external website to the site) and known user profile (for example, guest membership and preferences). The tool provides an effective way to dynamically deliver information to guests based on their choices, preferences, and actions.

Booking Engine

The integrated web booking engine within Oracle Hospitality Web Booking Engine Cloud Service guides guests through a simple, step-by-step process that enables them to check availability based on dates, room type, and rate. Throughout the booking process, the guest can access room descriptions and view photo and video galleries. Plus, targeted merchandising/up-selling is presented to the guest based on the guest's profile. The booking engine collects customer information and payment details, allowing the guest to review the reservation and make any necessary
