AutoVue Enterprise  
Visualization

Through the Oracle PartnerNetwork, partners with validated integrations are able to provide customers with standards-based product integrations, tested and validated by Oracle. Customers benefit from improved risk management and smoother upgrade capability, leading to a lower total cost of ownership and greater overall satisfaction.

*Experts on Oracle's AutoVue Enterprise Visualization Solutions*

*Lifecycle Technology is focused on developing integrated solutions for Oracle's AutoVue Enterprise Visualization and SAP.*

### Company Overview

Lifecycle Technology is a leading UK services company, highly skilled at leveraging a company's investment in Oracle and SAP applications. Lifecycle has more than 12 years of experience in delivering further value to SAP enterprise customers in technical-document intensive industries such as aerospace and defense, oil and gas, engineering and construction, industrial manufacturing, and utilities.

As an Oracle partner, we developed Lifecycle's Connector for Oracle's AutoVue and SAP version 2.0 by integrating Oracle's AutoVue Enterprise Visualization 20.0 with SAP business processes within asset lifecycle management (ALM), product lifecycle management (PLM), SAP document management system (DMS), and other content repositories.

### Integration Overview

Lifecycle's Connector for AutoVue and SAP 2.0 is a Web-based solution that adds the powerful and user-friendly viewing, mark-up, digital mock-up, and real-time collaboration capabilities of Oracle's AutoVue enterprise visualization tools to SAP. The result is an efficient, flexible, and secure solution for communicating information, sharing ideas across the global enterprise, and achieving faster time to market.

Oracle's AutoVue customers can expect

- Deep business process integration
- Pre built connector for SAP and Oracle's AutoVue
- Mark-up, print and collaboration capabilities to the wider SAP communities

### Integration Details

Lifecycle Technology understands the challenges of integrating applications into SAP and time-to-market pressures. Maintaining existing applications and exploiting new opportunities for integration within SAP requires knowledge and experience.

Lifecycle's solutions for AutoVue and SAP address the challenge of accessing, reviewing, and collaborating on documents—both internally and with globally

## Availability

dispersed teams and partners—securely and reliably without compromising precision.

Lifecycle's Connector for SAP 2.0 supports a distributed SAP environment. Lifecycle's Connector for SAP 2.0 supports a distributed SAP environment utilizing standard content and cache server technology be utilized.

Lifecycle's Connector for SAP has been developed using Oracle's AutoVue VueLink Integration, which is based on Oracle's Sun Java servlet technology, and built using AutoVue VueLink Integration SDK,— a Java-based framework that implements AutoVue document management (DM) API. AutoVue VueLink Integration is deployed as a Web application into the most commonly used J2EE application servers.

## Environment

### *Lifecycle Technology Environment*

Lifecycle's Connector for Oracle's AutoVue and SAP Version 2.0  
SAP ECC6 Versions 700, 701  
Oracle Database Release 10.2.0.4.0  
SAP GUI 7.10 Patch 11

### *Oracle Environment*

Oracle's AutoVue Enterprise Visualization Version 20.0
