Company Overview

Since 1988, Mastersaf has been a leader in the development of fiscal and tributary solutions, working with customers in different industry segments worldwide. Mastersaf works with several companies in Brazil because of the consolidated channel program and has more than 14,000 system users. The company continues to invest in the development of new technology to be able to offer innovative solutions for a variety of needs in the marketplace.

Integration Overview

This latest Mastersaf integration with Oracle E-Business Suite Release 12.1 uses Interdados, a tool built in Visual Basic 6.0 that enables users

- To manage data importation
- Access to extraction, load, and transformation (ETL) processes which are performed through Oracle Data Integrator
- Direct access to Oracle E-Business Suite tables, views, synonyms, and users

Validated Integration

Oracle E-Business Suite

Through the Oracle PartnerNetwork, partners with validated integrations are able to provide customers with standards-based product integrations, tested and validated by Oracle. Customers benefit from improved risk management and smoother upgrade capability, leading to a lower total cost of ownership and greater overall satisfaction.

Integration Details

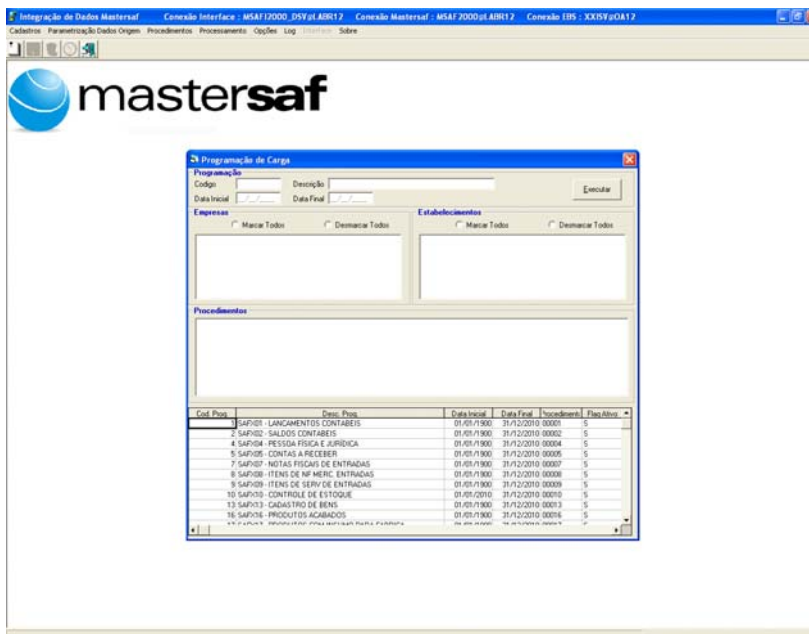

The Mastersaf integration with Oracle E-Business Suite 12.1 accesses views XXISV developed from data extracted from APPS tables according to Oracle E-Business Suite patch ID 8931153: LAD Add-on Localizations Release 12.1, ISV Integration Solution [ID 960846.1].

As a result of this new form of high-volume data extraction, the user will notice improved performance. By using Oracle Data Integrator, the integration consolidates the main steps of an ETL process. The accounting module in Oracle E-Business Suite provides the business data; Interdados applies fiscal rules and then formats and evaluates which fiscal data should be sent to Mastersaf Data Warehouse.
