The Campus Payment Solutions division of Sallie Mae partners with higher-education institutions to provide electronic billing processing; payments; electronic refund disbursement services; outsourcing of tuition installment plans; and 1098 Tax Credit reporting.

The integration with Oracle's PeopleSoft Enterprise Campus Solution 9.0 delivers real-time connectivity between Sallie Mae's NetPay 4.3 product and Oracle's PeopleSoft Student Financials 9.0.

Company Overview

Over the past several years, higher education institutions have consistently looked for ways to increase services for their students while maintaining the same, or even lower, costs associated with offering these services. As a leader in higher education financial services, Sallie Mae has helped schools with their mission. Sallie Mae has created a suite of Web services and business solutions designed specifically for higher education—Sallie Mae Campus Payment Solutions.

Sallie Mae Campus Payment Solutions is a Web services provider with a fully integrated suite of products, including a Web-based payment plan manager; a Web-based bill and 1098-T presentment; the ability to directly deposit a student's refund, and allow recurring, scheduled, and single payments for multiple events; and the ability to provide a full-service payment plan customized to the school's requirements on one platform, with one log-in for all services. Students can easily tab from each application for the desired information on billing, payments, refunds, and/or payment plan.

Integration Overview

The integrated solution delivers real-time connectivity between Sallie Mae's hosted NetPay 4.3 product and Oracle's PeopleSoft Student Financials 9.0 by:

- Transferring pertinent student demographic data, real-time account balance, and recent transactions activity from the schools' PeopleSoft Student Financials 9.0 securely into the NetPay 4.3 system
- Posting electronic payments processed by NetPay back to PeopleSoft Student Financials 9.0 and ensure the student's account balance reflects the change

Integration Details

The integrated solution encompasses the following components:

Through the Oracle PartnerNetwork, partners with validated integrations are able to provide customers with standards-based product integrations, tested and validated by Oracle. Customers benefit from improved risk management and smoother upgrade capability, leading to a lower total cost of ownership and greater overall satisfaction.
