*TimeLink delivers a comprehensive family of workforce management solutions.*

*TimeLink provides information to ensure that your organization is putting the right people in the right place at the right time.*

### Company Overview

TimeLink is a premier provider of workforce management and data collection solutions that enable organizations to both enhance employee productivity and leverage their investment in technology.

In today's business environment, an organization's workforce is its most valuable corporate asset—and often its most expensive. In many industries, labor resources can account for as much as 80 percent of total operating costs. This represents a significant opportunity for cost savings and productivity enhancement. TimeLink solutions leverage technology to uncover the value of the workforce, streamline your existing business processes, and provide tools to enhance productivity.

### Integration Overview

TimeLink Enterprise Edition is a leading enterprise workforce management and data collection solution for medium to large organizations across a wide variety of industries. It offers front-end capture and integration of time, attendance, and labor data into Oracle E-Business Suite. In addition, it provides an enterprise information platform that an organization's employees can use to access self-service related information, such as time card information or time/accrual balances.

Features include:

- Device management/integration services
- Workforce scheduling
- Time management
- Access control

### Integration Details

The integration between TimeLink and Oracle E-Business Suite provides the following features:

- The ability to send employee human resources and work-in-process information from Oracle Human Resources to TimeLink according to frequency, demand, or

### Validated Integration

#### Oracle E-Business Suite

Through the Oracle PartnerNetwork program, partners with validated integrations are able to provide customers with standards-based product integrations, tested and validated by Oracle. Customers benefit from improved risk management and smoother upgrade capability, leading to a lower total cost of ownership and greater overall satisfaction.
