Company Overview

TouchNet Information Systems, Inc., is a pioneer in delivering innovative commerce solutions to institutions of higher education. Since 1989, colleges and universities have relied on TouchNet to unify and secure commerce transactions throughout the campus enterprise. Today, TouchNet provides institutions with one of the industry's broadest range of commerce management software and services, and sets the curve in efficiency, technology, and trust.

Integration Overview

The integration of TouchNet's U.Commerce 6 with Oracle's PeopleSoft Enterprise Campus Solutions 9.0 provides real-time data flows that result in a secure campus commerce platform that automates the business office with comprehensive self-service functionality and enhanced in-line service. The integration provides processes for:

- Student self-service payments
- Automated paperless billing and payment
- Automated payment plan—self-service and payment
- Third-party access and payment
- Comprehensive in-person payment processing

Integration Details

The TouchNet U.Commerce integration with PeopleSoft Campus Solutions features a real-time request-response architecture that uses native PeopleSoft Campus Solutions integration points, including Oracle's PeopleSoft Integration Broker and PeopleSoft Component Interfaces applications. When an action—for example, a payment—is completed, the calling application sends the appropriate data in a request transaction and accepts the response data from the transaction. Using this methodology, TouchNet U.Commerce queries and updates PeopleSoft Enterprise in real-time, while PeopleSoft Enterprise remains the system of record.
