Every second counts

*Cesium for PeopleSoft Connector powering the integration of
ATS terminals and Oracle's PeopleSoft Time and Labor*

Company Overview

Accu-Time Systems is a global supplier of time-and-attendance terminals for use with workforce management solutions. Since its inception in 1996, it has been supplying products through channel partners to thousands of users. It is now owned by Amano, a company with a US\$1 billion turnover.

Integration Overview

Every second counts in workforce management. Cesium from Accu-Time Systems enables highly accurate time-and-attendance data collection, database and personnel management, data analysis, and reporting. By enabling two-way communications between ATS terminals and PeopleSoft Time and Labor, Cesium enables industry leading workforce management products to integrate with the world's premier talent management enterprise software solution.

Cesium for PeopleSoft Connector 2.0 offers

- Simplified terminal integration with PeopleSoft Time and Labor's time collection device (TCD) interface, providing configuration efficiency savings
- Terminal-specific configuration and optimal communications characteristics between Cesium and terminals

Through the Oracle PartnerNetwork, partners with validated integrations are able to provide customers with standards-based product integrations, tested and validated by Oracle. Customers benefit from improved risk management and smoother upgrade capability, leading to a lower total cost of ownership and greater overall satisfaction.

Integration Details

Cesium for PeopleSoft Connector 2.0 uses platform-independent Java to run on a variety of operating systems. Communications between ATS terminals and Cesium and between Cesium and PeopleSoft use XML over secure HTTPS.

Adoption of industry-standard protocols and formats reduces deployment complexity and enables Cesium to run on Linux/UNIX as well as Windows platforms and on a variety of databases including Oracle Database.

Cesium consumes data from the PeopleSoft Time and Labor TCD interfaces to synchronize employee badge data, schedules, task profiles, reporting metadata, and hours worked, keeping terminals up to date.

Cesium uses a batched store-and-forward mechanism to send punch data through to
