Integrate in days.

Simple, yet comprehensive, integration solution for hundreds of leading enterprise and cloud applications that enable you to integrate in days and cut integration costs by 80 percent or more

Company Overview

Cast Iron Systems is a leading cloud integration company that provides a simple and widely used solution for integrating software as a service (SaaS) and cloud applications with the enterprise in days. Cast Iron also empowers SaaS and cloud providers to increase customer loyalty by offering rapid integration to their customers.

Integration Overview

Cast Iron Systems created a simple solution designed specifically for integrating Oracle CRM On Demand with other applications. Cast Iron OmniConnect for application integration uses a “configuration, not coding” approach that dramatically simplifies application migration and integration projects and enables you to complete them in days.

Integration Details

Cast Iron OmniConnect for Oracle CRM is self-contained and provides everything needed to migrate data and integrate Oracle CRM On Demand with other applications and endpoints. The Cast Iron solution provides the following key features to simplify and accelerate data migration and integration with Oracle CRM On Demand:

Validated Integration

Oracle CRM On Demand

Through the Oracle PartnerNetwork Application Integration Architecture for Partners Initiative, partners with validated integrations are able to provide customers with standards-based product integrations, tested and validated by Oracle. Customers benefit from improved risk management and smoother upgrade capability, leading to a lower total cost of ownership and greater overall satisfaction.

- Connectivity: configurable connectivity to several applications and endpoints
- Transformation: a drag-and-drop user interface for data transformations
- Workflow: a visual interface for designing workflow rules
- Management: easy manageability through a single Web-based console
