*HP Database Archiving software—bringing better retention and long-term data compliance to databases*

*Proven integration with Oracle's PeopleSoft Enterprise 9.1*

### Company Overview

HP focuses on simplifying technology experiences for all of its customers—from individual consumers to the largest businesses. With a portfolio that spans printing, personal computing, software, services, and IT infrastructure, HP is among the world's largest IT companies. Its information management solutions help customers mitigate business risk and reduce costs through e-discovery/compliance, information availability, and IT infrastructure optimization offerings.

### Integration Overview

HP Database Archiving software for PeopleSoft Enterprise helps customers seamlessly implement proactive data management strategies to streamline and control the size of their production databases. It provides application access to archived data by leveraging native PeopleSoft Enterprise pages, reports, menus, and even third-party query tools—no end-user retraining is required. HP provides a broad range of coverage with ready-to-run archive modules. Data distribution and growth reports identify the right mix of archive modules recommended for each customer.

Key benefits include

- Manageable data growth, resulting in improved, sustained system operation
- Operational efficiencies achieved by managing smaller production databases and related clones
- Minimized downtime due to upgrades, patches, and recovery
- Reduced infrastructure costs (servers and storage)
- Full compliance with data retention and industry regulations

**Validated Integration**

PeopleSoft Enterprise

Through the Oracle PartnerNetwork Application Integration Architecture for Partners Initiative, partners with validated integrations are able to provide customers with standards-based product integrations, tested and validated by Oracle. Customers benefit from improved risk management and smoother upgrade capability, leading to a lower total cost of ownership and greater overall satisfaction.

### Integration Details

The HP Database Archiving solution provides ready-to-run modules with prebuilt business rules to ensure the integrity of your PeopleSoft Enterprise installation. It safely archives selected transactions in a complete fashion, so the integrity of the application is retained at all times. No changes to the application are required, so your support agreement with Oracle is maintained.

HP Database Archiving software provides the following key features:

**Availability**

+1.650.857.1501

- Web-based management console for managing multiple archive environments
- Combined access to archive and current data in a single report/query/application page
- Transparency layer generation and management
- Graphical design-time tool for creating/enhancing archive modules
- Ability to archive with users on the system
- Configuration parameters for adjusting archiving logic without coding effort
- Eligibility Analytics, providing design-time as well as runtime reporting on archive eligibility of PeopleSoft Enterprise data
- Reload of data back into production tables as required
- Automated change management for synchronizing with Oracle patches and system upgrades
- Operational recovery/restart
