Centralizes label-printing management from design to label print-job creation and printing.

Enterprise label solution validated with Oracle Warehouse Management and Oracle Mobile Supply Chain Applications

Company Overview

Loftware is an authority and global market software leader in delivering innovative business solutions for meeting a company's enterprise labeling requirements. Loftware's enterprise label and print management software suites enable organizations running Oracle, SAP, and other major enterprise resource planning (ERP), supply chain, and warehouse management applications to quickly develop and deploy complex barcode label and RFID smart label tags. Loftware has more than 20 years of experience in the enterprise labeling market and more than 25,000 customers worldwide, including hundreds of Loftware/Oracle customers that rely on its high performance, high value label printing.

Integration Overview

The Loftware Print Server 9.5.1 integration with Oracle Warehouse Management and Oracle Mobile Supply Chain Applications allows customers to enhance their investment in Oracle software. The Loftware Print Server forms the basis of Loftware's server-centric approach to enterprise label management, which is designed to simultaneously handle thousands of print requests targeted to hundreds of printers.

The Loftware Print Server offers an integrated solution enabling users to initiate label printing directly from Oracle Warehouse Management and Oracle Mobile Supply Chain Applications. It leverages the Loftware Print Server's core label management functionality (such as label design, print management, and job status) to print labels using data generated directly from Oracle Warehouse Management and Oracle Mobile Supply Chain Applications. Key benefits of the integrated solution include:

- Increased speed, throughput, and capacity for label printing
- Eliminated need to develop and maintain complex printer-specific code
- Flexible label design and automated label population
- Closed loop print status

Validated Integration

Oracle E-Business Suite

Through the Oracle PartnerNetwork, partners with validated integrations are able to provide customers with standards-based product integrations, tested and validated by Oracle. Customers benefit from improved risk management and smoother upgrade capability, leading to a lower total cost of ownership and greater overall satisfaction.

Integration Details

The Loftware Print Server integration with Oracle Warehouse Management and Oracle Mobile Supply Chain Applications provides an application continuum within the customer environment. Oracle Warehouse Management and Oracle Mobile Supply Chain Applications transmit data to the Loftware Print Server in XML, SQL, or PAS (Loftware standard) format. The Loftware Print Server identifies the correct label template for the transaction, automatically converts the print request into native printer language, and then initiates the print request to the target printer. The Loftware Print Server enables users to view and track the status of print requests initiated from Oracle Warehouse Management and Oracle Mobile Supply Chain Applications.

The Loftware Print Server can be deployed in enterprise architectures to support load dividing, fault tolerance, and automatic failover to assure continuous high-volume label production.

Integration of the Loftware Print Server and Oracle Warehouse Management and Oracle Mobile Supply Chain Applications.
