Through the Oracle PartnerNetwork, partners with validated integrations are able to provide customers with standards-based product integrations, tested and validated by Oracle. Customers benefit from improved risk management and smoother upgrade capability, leading to a lower total cost of ownership and greater overall satisfaction.

Enterprise Shipping Solution for Oracle E-Business Suite

AgileShip integrates with Oracle E-business Suite Release 12.1 to provide a full-function, multi-carrier, multi-location shipping and transportation management platform.

Company Overview

Agile Network is a developer of multi-carrier, multi location, global shipping and transportation management solutions for more than 1,000 clients throughout North America and Europe.

Agile Network shipping solutions support a range of enterprise applications, including consumer products, retail distribution, e-commerce, pharmaceuticals, healthcare, financial services, technology, industrial manufacturing and public sector institutions.

Agile Network shipping solutions automate the entire supply chain execution process, from real-time rating, routing and pack verification through single-click labeling and manifesting with a certified network of more than 5,000 small parcel, LTL, TL, air cargo and ocean freight carriers. Solutions integrate with a third party services to provide real-time export, hazmat and vendor compliance in addition to invoice audit and reconciliation/payment. Analytic tools support carrier performance assessment, transportation planning and fulfillment optimization.

Agile Network principals draw on more than 25 years of individual experience to identify complex shipping requirements, configure best-practice solutions, and continually work with clients to optimize transportation processes.

Integration Overview

AgileShip employs Oracle Fusion 11g to provide Oracle E-Business Suite applications with platform-integrated shipping capabilities. The integration allows order data to flow directly from sales, e-commerce and service applications through multiple distribution centers into AgileShip for real-time, multi-carrier rating, routing, manifesting and labeling. Upon execution, the integration supplies Oracle E-Business Suite applications with order and item-level tracking detail generated by AgileShip. Post-shipment, the integration collects delivery and validated charge data, which may be used for customer invoicing, freight payment and transportation management purposes.

Integration Details

The integration is designed to support the continuous exchange of data between AgileShip and Oracle E-Business Suite applications throughout the supply chain execution process.

The AgileShip integration allows Oracle E-Business Suite application users to realize a number of distinct benefits.

- AgileShip status as an Oracle Validated Integration ensures the integrity of data exchanged between Oracle E-Business Suite applications and Agile Network shipping software
- Originate shipments within Oracle E-Business Suite sales, order management and service applications
- Obtain real-time, rules-based rating and routing options during the order entry process to increase shipping choices
- Automatically process export, hazmat and vendor compliance measures to prevent delays, denials and penalties
- Automatically calculate DIM weights, verify pack contents, generate labels and manifest shipments to streamline handling operations
- Obtain carrier tracking numbers, real-time delivery status and charge data to satisfy customer inquiries
- Retrieve validated invoice and carrier performance data to minimize erroneous charges and improve transportation planning efforts
- Quickly scale shipping solutions within new and existing distribution centers to meet demand fluctuations
