Empowering Data Management

Manage Data Growth, Archive Inactive Data, and Maintain Access to Data

Company Overview

Solix Technologies is a leading provider of enterprise data management solutions. Solix has successfully empowered organizations worldwide to achieve information lifecycle management goals. Solix is a CMM LEVEL 5 company with an extensive global client base, including Fortune 500 companies. Solix automates enterprise data archiving, application migration, and application upgrades.

Integration Overview

Solix EDMS seamlessly integrates with various enterprise resource planning solutions and custom applications to relocate historical data from production to archive.

The metadata repository is platform independent and can support any RDBMS, including Oracle Database. Solix EDMS generates reusable ANSI SQL code, so the configurations can migrate data from one database to another.

The solution provides the following features:

- Allows complex business validations to be built on the tables to be archived
- Ensures data referential integrity
- Eliminates the need to synchronize procedures every time a patch is applied
- Ensures complete and secure archiving of data

INTEGRATED WITH

PEOPLESOFT ENTERPRISE

Through the Oracle PartnerNetwork Application Integration Architecture for Partners Initiative, partners with validated integrations are able to provide customers with standards-based product integrations, tested and validated by Oracle. Customers benefit from improved risk management and smoother upgrade capability, leading to a lower total cost of ownership and greater overall satisfaction.

Integration Details

Solix EDMS uses the registered knowledgebase, including the tables, columns, relations, and joins, to group related tables into a configuration. Users can build criteria on the configurations and generate the code.

Solix EDMS integrates with Oracle's PeopleSoft Enterprise solutions, Oracle General Ledger, Oracle Accounts Payable, and Oracle Purchasing.
