Company Overview

Hewlett-Packard provides technology solutions to consumers, businesses, and institutions. HP software helps IT organizations make sure that the dollars they spend deliver positive business outcomes. Its business technology optimization products automate key processes across IT functions, and its OpenCall platforms enable people to communicate and access services. As the focus of IT shifts from systems management to business results, companies are investing in HP software to lower costs, improve delivery time, and reduce risk.

Integration Overview

HP offers a complete testing solution for Oracle customers installing and upgrading to Oracle's PeopleSoft 9.1. It is unusual when a PeopleSoft implementation is adopted "as is," with no modifications to account for customized environments. To verify that an PeopleSoft implementation functions and all business processes that span multiple systems perform as expected, PeopleSoft customers will greatly benefit from using automated functional testing tools, such as HP QuickTest Professional 11.0. These tools can be used to create reusable, easy-to-maintain test scripts that will allow customers to verify the functionality of their implementation and avoid any regression in quality early in the testing cycle.

Through the Oracle PartnerNetwork, partners with validated integrations are able to provide customers with standards-based product integrations, tested and validated by Oracle. Customers benefit from improved risk management and smoother upgrade capability, leading to a lower total cost of ownership and greater overall satisfaction.

Integration Details

HP QuickTest Professional 11.0 for PeopleSoft simplifies creating and maintaining automated tests of PeopleSoft applications. It provides comprehensive support to make tests and components simple to read, maintain, enhance, and parameterize, enabling both advanced and novice users to create sophisticated tests and components for applications developed using PeopleSoft.

As a customer records on a PeopleSoft application, HP QuickTest Professional inserts statements into the test or component that represents the operations performed. The customer can:

- Instruct HP QuickTest Professional to record a specified PeopleSoft application session or record on any open browser
