### *Content-Enable Your Oracle JD Edwards EnterpriseOne Applications*

*Easily access, view, and initiate tasks on documents associated with transactions directly from within or outside the JD Edwards EnterpriseOne environment.*

#### **Company Overview**

SYSTIME, a KPIT Cummins venture, is a solution provider for Oracle's JD Edwards applications. SYSTIME helps customers make their business better by adopting technology solutions to address their operational challenges. SYSTIME has achieved Oracle PartnerNetwork (OPN) Advanced Specialization in JD Edwards EnterpriseOne Financial Management, JD Edwards Enterprise One Distribution and JD Edwards EnterpriseOne Configurable Network Computing (CNC). For over three decades SYSTIME has helped clients implement and manage JD Edwards and other business solutions in 77 countries. With SYSTIME, clients have a transparent, responsive partner committed to their success. SYSTIME is a Platinum-level member in the Oracle PartnerNetwork.

#### **Integration Overview**

The SYSTIME Oracle's JD Edwards Adapter for Oracle WebCenter 1.0 offers a flexible, scalable, and secure integration that allows employees, customers, and suppliers to collaborate, contribute, and access content anywhere worldwide. The adapter integrates Oracle WebCenter 11g with JD Edwards EnterpriseOne 9.0 to enable business users to leverage a centralized content repository and document management and workflow capabilities beyond those natively available in JD Edwards EnterpriseOne.

With a full array of enterprise content management services integrated within business applications, organizations can effectively and efficiently capture, share, and distribute digital and originally paper-based documents and reports via JD Edwards EnterpriseOne.

Key features include:

- Out-of-the-box, standards-based integration with JD Edwards EnterpriseOne
- Content management infrastructure with capture, imaging, document library services, and workflow
- Support for hundreds of types of documents, images, graphics, and audio and video files
- Shared services deployment model that extends content services across multiple JD Edwards EnterpriseOne modules

#### **Integration Details**

There are two types of integration solutions available with the SYSTIME JD Edwards

#### **Validated Integration**

JD Edwards  
EnterpriseOne

Through the Oracle PartnerNetwork, partners with validated integrations are able to provide customers with standards-based product integrations, tested and validated by Oracle. Customers benefit from improved risk management and smoother upgrade capability, leading to a lower total cost of ownership and greater overall satisfaction.

Adapter for Oracle WebCenter:

### 1. Imaging Solution—Financial Management Automation

The SYSTIME JD Edwards Adapter for Oracle WebCenter delivers an advanced imaging and workflow solution with a core set of features that help manage large volumes of content, convert paper-based content to electronic formats, and facilitate operations across functions that support critical business processes.

SYSTIME offers an integrated solution to optimize the Financial Management module within JD Edwards EnterpriseOne, which is built on top of the imaging solution. By coupling document capture and imaging technology with advanced workflow capabilities, financial departments can dramatically decrease costs and cycle times while increasing productivity and financial control.

Customers can access the workflow task list, cross-reference images, and manage attachments from within JD Edwards EnterpriseOne forms. They can also access the task list via e-mail links.

### 2. Managed Attachments Solution

For business processes that are less structured in nature and require more ad hoc collaboration, the SYSTIME JD Edwards Adapter for Oracle WebCenter offers a functionality to manage and associate digital documents to transaction entries from within JD Edwards EnterpriseOne forms. Distributed capture also offers the ability to digitize any paper-based document that needs to be associated with business processes.

## Environment
